(Engineer) will provide to the City of Pflugerville (City) services for preparation and submittal of the USDOT Better Utilizing Investments to Leverage Development (BUILD) application for funding based on the project development of three roadways as part of the 2019 Pflugerville Transportation Bond program. The identified roadways for funding consideration are Picadilly Drive (Central Commerce to IH35 frontage road), Royston Lane (Grand Avenue Parkway to Central Commerce) and Central Commerce (City limits to Picadilly Drive). The proposed services are to be completed with a formal application submitted by July 15, 2019. The BUILD application for funding is separated into the following Tasks and described in more detail below:

- Task 1: Project Management and Coordination
- Task 2: Application Preparation
- Task 3: Conceptual Level Exhibit Design
- Task 4: Desktop Environmental Analysis

#### TASK 1: PROJECT MANAGEMENT & COORDINATION

##### 1.1 Progress Meetings, Reports, and Monthly Invoicing

For the work performed, Engineer will prepare Monthly Invoices billed as a percentage complete per task and Progress Reports. These Reports will include:

- Tasks completed during the reporting period & planned for upcoming periods.
- Issues encountered and recommended actions to address them.
- Overall Project status and development progress, including a tabulation of Tasks showing percentage complete, and supporting documentation

## 1.2 Coordination and administration of work products

- Administration - Engineer shall designate one Texas Registered Professional Engineer as the Project Manager responsible for Project management, coordination, and communications.
- Coordination - Engineer will manage Project activities, attend meetings with City staff, coordinate with City's third party consultants on application preparation, handle deliverables, and keep records of project communications / files. Engineer is of the assumptions that any Grant writing associated with the BUILD application will be provided by the City or City's third party consultant; that any economic forecast modeling associated with the application for BUILD application will be provided by the City or City's third party consultant.

## TASK 2: APPLICATION PREPARATION

### 2.1 Data Collection and Review

- Engineer will review previous BUILD applications to be provided by the City's third party consultant.
- Engineer will collect existing electronic topographic information as well as existing infrastructure information and review for the basis of preparation of the conceptual level exhibit design.

### 2.2 Application Submission

- Engineer will complete the formal BUILD application (to be provided by the City or City's third party consultant). Only applicable sections of the Project Information Form will be completed by the Engineer. Engineer will not prepare any economic forecast input portions of the form. Engineer will provide technical information to the City for use in writing the application for the following sections; Project Location, Grant Funds/Sources and uses of all project funding, selection criteria, and Project Readiness.
- Engineer will prepare any associated exhibits in support of the application including but not limited to items described in Tasks 3 & 4. Engineer will allocate no more than two (2) meetings for submittal and support of the BUILD application. Meetings may include formal delivery of the application, application review meetings with the TxDOT or other jurisdictional entity, or public meeting in support of the application.

## TASK 3: CONCEPTUAL EXHIBIT DESIGN

### 3.1 Preliminary Engineering

Engineer will develop a conceptual exhibit of the proposed roadway improvements to be submitted with the BUILD application. It is assumed that a three lane typical roadway section will be utilized for each of the collector roadways identified in this proposal. This conceptual exhibit will incorporate ready available electronic

information and will identify anticipated horizontal roadway improvements. Preliminary drainage design, roadway plan and profiles, utility relocations, utility design and vertical conformance to TxDOT roadway design criteria will not be incorporated or included in this conceptual design. The intent of the proposed conceptual design is for illustration purposes as part of the application. The conceptual design will not be equivalent to the TxDOT standard schematic level design, however elements of the conceptual will be incorporated into the anticipated TxDOT level exhibit as part of a future design contract between the City and the Engineer.

### 3.2 Roadways (Picadilly Drive, Royston Lane, Central Commerce)

- Existing and Proposed Typical Sections
- Horizontal Alignment Development
- Proposed pedestrian improvements will be preliminary identified on both side of the roadways.

### 3.3 Pavement Marking Design

- Engineer will develop overview pavement marking plans for the conceptual exhibit. These overview layout plans will depict lane configurations, construction areas, and striping necessary for the project.

### 3.4 Quantities and Preliminary Cost Estimates

Engineer will calculate preliminary quantities for each of the following as necessary to provide and Engineer's estimate of probable cost. A high level of construction contingency (minimum 20%) will be allocated to the estimate for purposes of the BUILD application. Further detailed schematic design opinions of probable cost will be provided for the Project as part of a future design contract between the City and the Engineer.

- Roadway
- Drainage improvements
- Removal
- Erosion and Sediment Control
- Street Lighting
- Pavement Marking

## TASK 4: DESKTOP ENVIRONMENTAL ANALYSIS

As part of the application package for the U.S. Department of Transportation administered BUILD Grant, Half proposes to conduct a Desktop Environmental Constraints Analysis and develop a scoping and permitting summary for the proposed roadway project. The analysis will evaluate potential project constraints including:

- Waters of the United States, including wetlands

- Threatened and Endangered Species
- Cultural Resources
- Public/Protected Land
- Land use/Land Cover
- Hazardous Materials

The Desktop Environmental Constraints Analysis will utilize available background resources including (but not limited to):

- United States Geological Survey (USGS) Topographic Maps
- USGS National Hydrography Dataset
- Natural Resources Conservation Service Soil Surveys
- United States Fish and Wildlife Service (USFWS) National Wetland Inventory Data
- Recent and historic aerial photography
- State and Federal Regulatory Databases
- USFWS Information for Planning and Consultation Report
- Texas Natural Diversity Database
- USGS Protected Areas Database
- Ecological Mapping System of Texas
