- The City will charge every retail utility customer the City water rates, which include the Monthly Base Charge and the Volume Charge as set forth in this section.
- In the event of a catastrophic water leak by a residential water customer, the City may allow credit to the customer's bill under the following circumstances. A minimum usage of 40,000 gallons more than the previous month's usage will make the customer eligible for consideration of a credit to the customer's account. The average of the past twelve months of usage will be used as a base for crediting 100% of the excess usage billed (amount of credit will be based on the highest rate per 1,000 gallons). The City would require the customer to submit a written request for credit with a copy of the bill from a licensed plumber certifying that the leak has been repaired and a copy of a valid City of Pflugerville Building Permit for the repair. The request must detail the location and dates of the leak. Customers who have been notified of a leak but have not repaired it within 15 days of notification will not qualify for the credit. Customers are eligible for only one credit per account location.
- Rates for larger sized meters are subject to separate agreement with the City.
- The City will charge every retail utility customer served by the City wastewater rates that include the Monthly Base Charge and the Volume Charge as set forth in this section.
- The quantity of wastewater used to calculate the volume charge for wastewater will be determined as follows:
  - Residential Customers: Each March, the City will determine each customer's water usage during the preceding November, December, January, and February and calculate the average of the three (3) lowest water usage months during that period. The average will be used to calculate the customer's volume charges until next March, when the average will be recalculated. For customers that do not receive water service from the City, the quantity of wastewater used to calculate the monthly bill will be determined by calculating the city's average usage for residential customers during the preceding November, December, January and February.
  - Non-Residential Customers: The City will determine each customer's water usage during the month and that amount will be used to calculate the customer's volume charges. For customers that do not receive water service

from the City, the quantity of wastewater used to calculate the monthly bill will be determined by calculating the city average usage for residential customers during the preceding November, December, January and February.

6. Each customer must pay the deposit set forth in this section or replenish the deposit if the City draws upon it, when the customer initially applies for the service or when the customer applies to reinstate service that has been disconnected for nonpayment of a bill. The customer's deposit will be returned in full if the customer's account has not been delinquent for 12 consecutive months. The customer's deposit will be returned, less any outstanding balance, within 30 days from the day the customer's account is closed if the amount due is \$2.00 or more. Construction/Fire Hydrant meter deposits will be returned, less any outstanding balance, upon receipt of meter. If the difference between the amount of the deposit and the outstanding balance is less than \$2.00, the difference will be refunded only at the customer's request. An application for a refund of less than \$2.00 must be made within 90 days after the date the customer's account is closed or the customer forfeits the right to the refund.
