Re: Professional Engineering Services for  
Rehabilitation of Wastewater Lines (Project No. WW2306)

Dear Mr. Pritchett,

Quiddity Engineering, LLC (Quiddity) appreciates the opportunity to present this Proposal for professional engineering services in connection with the City of Pflugerville (the City) *Rehabilitation of Wastewater Lines* project (the Project).

## PROJECT UNDERSTANDING

Quiddity understands the City desires to rehabilitate the wastewater lines within the Great Basin interceptor and Gatlinburg neighborhood. The gravity sewers within these areas are predominantly PVC pipe, over 30 years old and have seen significant issues with both inflow and infiltration (I&I) and sewer deflections in the gravity lines. The City is also interested in investigating and rehabilitating the interceptor trunkline along Great Basin Avenue. Table 1 presents the estimated sewer linear footage by diameter and number of manholes based on City GIS information.

**Table 1 - Gravity Sewer Linear Footage**

Neighborhood	Gravity Line Size	Linear Footage	Manholes
Gatlinburg	6"	16,427	62
	8"	2,900	
	12"	3,000	
Great Basin Ave	15"	1,165	18
	24"	2,300	
<b>Total</b>		<b>25,792</b>	<b>80</b>

It is Quiddity's understanding the City desires to perform a condition assessment of the Gatlinburg neighborhood and Great Basin interceptor gravity sewer by means of cleaning and televising (C&TV) in order to establish the basis for which the rehabilitation is identified. A bid package of overall layout plan exhibits and specifications will be put together to directly solicit Contractors for the C&TV work. The C&TV is assumed to be completed to NASSCO standards. Smoke testing will be bid as an alternative, which can be awarded at the City's discretion.

It is understood the City will provide detailed review of the C&TV performed of the approximate 25,792 LF and 80 manholes. The City will provide Quiddity with a detailed sheet of pipe and manhole defects identified based upon an agreed upon system of naming and nomenclature, approximate location, and a severity ranking schedule.

Mr. Brandon Pritchett

Page 2

June 26, 2024

Based on the City provided pipe and manhole defect assessment, Quiddity will evaluate potential rehabilitation methods and draft a Preliminary Engineering Report (PER) that includes a summary of the pipe and manhole defects identified and the recommendations for the future sanitary sewer rehabilitation. The rehabilitation methods evaluated will include cured-in-place pipe (CIPP), pipe bursting, and open-cut remove and replace along existing alignment. The existing manholes are predominantly made of concrete, and Quiddity understands the City's preferred method of rehabilitation is applying high-build epoxy coating. The PER will include GIS exhibits identifying sections with the recommended rehabilitation or replacement for which final design will be based, summary of by-pass pumping plan considerations, and an Association for the Advancement of Cost Engineering (AACE) Class IV Opinion of Probable Construction Cost (OPCC).

Final Design and Construction Phase Services for the rehabilitation of these gravity sewers is **not** included with this proposal. After completion of the PER and agreement by the City on the proposed methods of rehabilitation, if requested, Quiddity can provide additional scope, compensation, and schedule associated with this work.

This Proposal will be included and referenced within the City's *Professional Supplemental Services Agreement* (the *Agreement*). Quiddity prepared the following scope of services, compensation proposal, and schedule for the City's consideration of approval to be referenced in the *Agreement* as **Attachment A**.
