Compliance by subcontractors with this Agreement shall be the responsibility of Consultant. City shall in no event be obligated to any third party, including any subcontractor of Consultant, for performance of services or payment of fees. The Consultant understands that failure to provide said form complete with a certificate number assigned by the TEC may prohibit the City from entering into this Agreement. Pursuant to the rules prescribed by the TEC, the TEC Form 1295 must be completed online through the TEC’s website, assigned a certificate number, printed, signed and notarized, and provided to the City. The TEC Form 1295 must be provided to the City prior to the award of the contract. The City does not have the ability to verify the information included in a TEC Form 1295, and does not have an obligation or undertake responsibility for advising Consultant with respect to the proper completion of the TEC Form 1295.

XV. SEVERABILITY

If any clause or provision of this Agreement is held invalid, illegal or unenforceable under present or future federal, state or local laws, including but not limited to the City Charter, City Code, or ordinances of the City of Pflugerville, Texas, then and in that event it is the intention of the Parties hereto that such invalidity, illegality or unenforceability shall not affect any other clause or provision hereof and that the remainder of this Agreement shall be construed as if such invalid, illegal or unenforceable clause or provision was never contained herein; it is also the intention of the Parties hereto that in lieu of each clause or provision of this Agreement that is invalid, illegal, or unenforceable, there be added as a part of the Agreement a clause or provision as similar in terms to such invalid, illegal or unenforceable clause or provision as may be possible, legal, valid and enforceable.

Further, any failure of either Party to insist in any one or more cases upon the strict performance of any of the covenants of this Agreement, or to exercise any option herein contained, shall in no event be construed as a waiver or relinquishment for the future of such covenant or option. In fact, no waiver, change, modification or discharge by either Party hereto of any provision of this Agreement shall be deemed to have been made or shall be effective unless expressed in writing and signed by the Party to be charged. In case of City, such changes must be approved by the City Council, as described in Article XVI. Amendments. We would be happy to schedule a call to review this proposal at your convenience.

PROJECT BACKGROUND

The City of Pflugerville, Texas (CLIENT/City) has requested Verdunity's assistance to develop a GIS-based fiscal model of the City's current development pattern. This information can then be used to inform land use and zoning decisions, development incentives, capital improvement programs and service delivery optimization efforts.

SCOPE OF SERVICES

We are proposing to complete following tasks as part of this contract.

BASIC SERVICES

PHASE 1: EXISTING CONDITIONS MODEL - Verdunity (VU) will complete an assessment of existing conditions and prepare a summary of study findings and recommendations in a format that can be shared with Council and the community.

1.1 Project Initiation & Coordination – To kick off the project, VU staff will come to the City to meet with staff, discuss data needs and availability, and present an overview of our process and deliverables to Council. Bi-weekly coordination calls will be held with staff to update progress and coordinate information needed. Written progress reports will be submitted monthly with invoices.

1.2 Data Collection and Review – VU will work with CLIENT to obtain and review available information relevant to the study. Where possible, we would like to receive data in electronic format, and in particular any GIS, XLS and database files associated with infrastructure, land use and developments. Information we would like to review will include, but not be limited to:

- Comprehensive Plan, Master Plans
- Development Regulations/Ordinances
- Developer and Special Utility District Agreements – existing and proposed
- Budget and CAFRs
- Asset Management and CIP information – with special emphasis on any information for existing streets

- Property Tax Data – levy data for 2017 or 2018 (if available) from Travis and Williamson County Appraisal Districts. *May require a data acquisition fee to get the levy data from the county's vendor.*

1.3 Revenue Mapping – VU will utilize available data to map existing property tax revenues and summarize fiscal performance for different neighborhoods and development patterns. Tasks will include:

- Input, clean up and format property tax levy revenue data for parcels in city limits
- Prepare 2D and 3D maps showing property tax levy revenue per acre (or SF)

1.4 Net Revenue Map (Budgeted Costs) – Costs from the existing General Fund budget (services funded by property taxes) will be added to the model and a net revenue map will be prepared showing the fiscal performance of parcels (net revenue = property tax levy revenue less budgeted service costs). Tasks will include:

- CAFR and Budget Review – cursory review to assess the general fiscal situation, benchmark against similar communities, and summarize trends
- Identify and allocate budgeted service costs (general fund) to parcels in city limits
- Calculate net revenue and ROI (return on investment) for parcels and city overall
- Prepare 2D and 3D maps showing net revenue per acre (or SF)
 - Current and future land use (for undeveloped parcels)
 - Current zoning districts

PHASE 2: DEFICIT/PROJECTED COSTS MODEL – The model developed in Phase 1 will be expanded to incorporate the costs for street maintenance and other services that are needed, but not currently accounted for in the City's budget. This model helps understand how different development patterns perform financially when you add in the true cost to maintain/replace the infrastructure and services supporting the development. We often refer to this as a city's resource gap or deficit.

2.1 Service Cost and Infrastructure Replacement Projections – VU will review available data and work with staff to estimate the age of various neighborhoods in the city and project infrastructure replacement costs and other services that are not currently accounted for in the City's budget.

- Neighborhood Age Map – map showing age of neighborhoods by decade
- Projected infrastructure replacement costs by decade

2.2 Net Revenue Map (Projected/Currently Unfunded Costs) – Costs from 2.1 will be allocated down to the parcel level. Results will be added to the analysis from 1.4 to generate updated net revenue and ROI maps that include projected costs.

2.3 Development Pattern Analysis – VU will review the models and identify trends and takeaways for:

- The overall city
- Existing neighborhoods and/or geographic areas of the city
- Existing land uses, zoning districts, lots sizes and development patterns

PHASE 3: ANALYSIS AND RECOMMENDATIONS – Once the modeling is done, we will review the results and prepare a summary of findings and recommendations that can be shared with Council and the community.

3.1 Prepare Summary Report and Presentation – VU will summarize findings into a concise, easy-to-understand presentation and support documents that can be shared with elected officials, staff, residents and developers. Information will be included that will provide guidance to staff and council for upcoming decisions on land use, zoning and code revisions, infrastructure investments, special utility districts, and annexation decisions. Deliverables will include:

- Report (PDF and MS Word) with executive summary and appendices
- Presentation
- GIS shapefiles with result fields

3.2 Presentations– VU will be available to present a summary of the study process, findings and recommendations to staff, elected and appointed officials and the broader community, if desired. Presentations we’ve accounted for in this proposal include:

- Review of draft report with staff
- Work/executive session with staff and council
- Presentation to council and public at a regular council meeting

ADDITIONAL (SPECIAL) SERVICES

After development and presentation of the model results, VERDUNITY staff will be available to support the City with subsequent discussions and revisions on an hourly basis. Additional options that can be discussed include utilizing the model and our proprietary development context data to evaluate proposed development scenarios, which could include Future Land Use Plan buildout scenarios, annexation and growth management decisions, proformas for special districts and other new development being considered in the city, and infrastructure investment strategies.

SCHEDULE

Our typical turnaround for similar projects has been 4-5 months. We understand staff’s goal is to have information and recommendations available to consider as part of the FY2020 budget process, which is already underway. We can accommodate a compressed schedule of 2-3 months and have preliminary results completed in time for the July 23 Council work session on the proposed budget, but we would need to start before the end of May. We would not increase the fee for the compressed schedule, but we would request an up-front retainer payment of 20% of the base fee due within two weeks of contract initiation. We are prepared to begin work as soon as we receive an electronic copy of the executed agreement and written notice to proceed (email is acceptable).

FEE

We are proposing to complete the work described in Basic Services for a total lump sum fee of \$63,000. This includes reimbursable expenses for travel, printing and levy data acquisition.

If required, hourly assistance (Additional Services) will be billed hourly using the following hourly rates:

Principal	\$225
Sr Engineer/Sr Planner	\$180
Civil Engineer/Planner	\$150
EIT/ Graphic Designer	\$125
Database Manager/Analyst	\$110

GIS/CAD Tech	\$75

Should the CLIENT desire hourly assistance, the work and anticipated costs will be discussed and authorized by the CLIENT prior to VERDUNITY doing any work.
