Mr. Brandon Pritchett Public Utilities Director City of Pflugerville 15500 Sun Light Near Way, #B Pflugerville, Texas 78660

Re: Professional Engineering Services for Reclaimed Water Master Plan Update

Dear Mr. Pritchett,

Quiddity Engineering, LLC (Quiddity) appreciates the opportunity to present this Proposal for professional engineering services in connection with the City of Pflugerville (the City) *Reclaimed Water Master Plan Update* project (the Project).

### PROJECT UNDERSTANDING

Quiddity understands the City desires to develop a Reclaimed Water Master Plan Update report. Quiddity is to perform master planning of infrastructure to distribute direct non-potable, Type I reclaimed water from the City's Central Wastewater Treatment Plant (Central WWTP). This project will include determination of potential customer profiles, coordination with ongoing City CIP projects and development, defining a customer profile that maximizes Central WWTP reclaimed water use, identifying growth planning models and incentive structure(s) for Large Volume Users (LVUs), and development of a Reclaimed Water Capital Improvements Plan (CIP) for 2023 through 2043.

Quiddity understands that the City has undertaken previous endeavors to identify the potential reclaimed water use customer profile, develop plans for reclaimed water treatment and distribution as well as analyze the viability and benefits of direct and indirect, potable and not-potable reuse water uses. The outlined scope of services and basis of compensation hereon will build on data collected in the Reclaimed Water Master Plan by DCS Engineering, LLC, dated January 2015 (*RW Master Plan*) and the Reclaimed Water Feasibility Study by CP&Y, Inc., dated May 18, 2022 (*Feasibility Study*).

The *Feasibility Study* identified the top 17 potential existing reclaimed water customers out of the top 200 largest water users based on presumed large irrigation demands and proximity to the Central WWTP. This scope of work includes reviewing City provided water meter data from the past 5 years to assess the top 200 largest water users and determine potential reclaimed water use candidates that can be added to the LVU list.

The *RW Master Plan* and *Feasibility Study* both addressed future potential customers. The *RW Master Plan*, having been completed in 2015 is likely out of date with the progress of Development throughout the City's service area. The *Feasibility Study* provided overall maps of areas and potential types of

Mr. Brandon Pritchett Page 2 August 10, 2022

development. This scope of work includes an updated assessment of the future LVU reclaimed water candidates including working with Development Services to identify future development.

It is understood from the *Feasibility Study* and discussions with City staff that Direct Potable Reuse and Indirect Potable and Non-Potable Reuse methods are currently, or will be, under further analysis by others. This proposal is for a Reclaimed Water Master Plan that focuses on expansion and optimization of the City's existing direct non-potable Type I reclaimed water system from its Central WWTP. The scope of services and basis of compensation assumes the City has obtained from its consultants or maintains electronic files of water demand and reclaimed water demand data (in MS Excel), electronic files of exhibits or attachments (in ArcGIS, AutoCAD, or similar format), and GIS shapefiles of it's existing reclaimed water system, City limits and other pertinent information to share with Quiddity in order to expedite updating of the Reclaimed Water Master plan.

Based on our understanding of the contract process, this proposal will be included and referenced within the City's *Professional Services Agreement* (the *Agreement*). Quiddity prepared the following scope of services, compensation proposal, and schedule for the City's consideration of approval to be referenced in the *Agreement* as **Attachment A**.

## **SCOPE OF SERVICES**

## **BASIC SERVICES:**

## 1. Identify Potential Customer Profile:

1.1 Review existing data, authorizations, agreements and reports made available by the City, including:

- Central WWTP reclaimed water quality results for the last 5 years,
- City's historical water usage for the past 5 years,
- City Development projects, including under construction, in permitting, and projects anticipated but still pending
- City's current reclaimed water authorization with the TCEQ
- City's reclaimed water agreements(s) with current customers
- 2015 Reclaimed Water Master Plan
- 2020 Wastewater Master Plan Update
- 2020 Water Master Plan Update
- City's 2021-2024 Strategic Plan
- 2022 Reclaimed Water Feasibility Study

Mr. Brandon Pritchett Page 3 August 10, 2022

- 1.2 Identify current City Large Volume Users (LVUs) of potable water that are potential for reclaimed water customers.
  - Review City provided 2022 water meter data, through October 2022 to assess the current top 200 largest water users and determine if there are any additional major potential candidates that can be added to the LVU list.
  - Develop a LVU questionnaire for assessing customer potential.
  - Coordinate with the City on questionnaire and verbally engage LVUs on interest of reclaimed water.
  - Catalogue correspondence for City future reclaimed customer polling and tracking.
- 1.3 Identify future Large Volume Users (LVUs) of potable water that are potential for reclaimed water customers.
  - Review and update previous analyses of future LVUs for reclaimed water use. Research and development of future LVUs list shall be limited to developments or properties planned for development that are known and documented with the City Development Services department.
  - Develop an LVU questionnaire for assessing customer probability of future reclaimed water use.
  - Coordinate with the City Development Services department for Developer contacts and verbally engage utilizing the LVU questionnaire.
  - Categorize and catalogue responses for development of incentive structures and City's use in future reclaimed customer polling.

## 2. Screening-Level Alternative Development and Evaluation:

- 2.1 Evaluate up to three non-potable reclaimed water uses viable for incorporation into alternative development of reclaimed water distribution system in addition to identified current and projected LVUs, including cooling towers, light industrial use, and water hauling stations.
- 2.2 Identify potential reclaimed water service areas and develop up to four conceptual alignment alternatives based on planning level cost per demand.

## 3. Identify Growth Planning and Incentive Structures:

- 3.1 For up to two preferred alternatives selected from screening level evaluation, identify growth planning components, including:
  - Complementary water/wastewater CIP projects for incorporation of main transmission installation and/or easement acquisition.

Mr. Brandon Pritchett Page 4 August 10, 2022

- Based on land use allocations for commercial/light industrial use, identify up to 5 target markets for high value/demand capacity return and align with the City's 2021 to 2025 strategic plan.
- 3.2 Develop incentive structure for the following reclaimed water customer categories:
  - Residential
  - Developers
  - Targeted Market
- 3.3 Identify financing strategies and funding opportunities for the proposed Reclaimed Water Capital Improvements Projects that are available to cities for reclaimed water implementation projects and establish opportunities to be pursued, if applicable. This shall include assessment of bonds, loans, and grants as options.

#### 4. Reclaimed Water System Modeling and Project Implementation Phasing:

- 4.1 Create reclaimed water system with InfoWater Pro based on selected reclaimed water alternatives.
- 4.2 Conduct modeling analysis for daily minimum, average and maximum demand conditions for up to three (3) points in time, including ultimate build-out of the Central WWTP service area as defined in the City's Wastewater Master Plan.
- 4.3 Based on previously defined complementary water/wastewater project, develop draft projects phasing for the reclaimed water distribution system, including brief description and alignment map, CIP costs, and schedule for the two (2) preferred alternatives. This effort shall include assessment of storage and/or re-pressurization facilities and pipeline infrastructure. This effort does not include analyzing the Central WWTP effluent quality as it is understood that is under analysis by others. It is understood the Central WWTP already treats to Type I reclaimed water standards.
- 4.4 Prepare step-by-step summary of funding opportunities identified and impacts to project costs and schedule of funding reimbursement.
- 4.5 Present preliminary implementation phasing to City for review, comment, and identification of project "go" triggers, as required.
- 5. Reclaimed Water Master Plan Update Report and Council Assistance:
- 5.1 Prepare a draft Reclaimed Water Master Plan Update report for City review and comment.

Mr. Brandon Pritchett Page 5 August 10, 2022

- 5.2 Review City provided comments, provide response or incorporation, and finalize Reclaimed Water Master Plan Update report.
- 5.3 Assist the City in the development of a project summary presentation for City Council and attend one(1) City Council Meeting to answer questions and discuss Master Plan content, as needed.

### 6. Project Management Services:

- 6.1 Throughout the duration of the Project, manage project: scope, schedule, quality, staff resources, project documentation, and communications.
- 6.2 Conduct Project Kickoff Meeting and attend up to 10 regularly scheduled monthly meetings, including preparation of a Meeting Agenda, post-meeting Minutes, and summary of Action Items from the meetings. This scope of work includes up to three (3) in person meetings, at times deemed necessary by Quiddity throughout the project for project coordination and presentation. The remaining meetings will be virtually via TEAMS.
- 6.3 Conduct a Reclaimed Water Alternative Selection Workshop and Implementation Phasing Workshop, including preparing meeting Agenda, Minutes and Action Items.
- 6.4 Perform Quality Assurance/Quality Control (QA/QC) for the anticipated duration of the entire project.

#### SUPPLEMENTAL SERVICES

These services will only be performed if required to complete the project and if authorized by the City, with additional compensation.

7. Additional Reuse Areas and Types of Uses

This proposal does not include analysis of reclaimed water uses outside of the Central WWTP service area. This proposal does not include assessment or review of the viability and benefits of direct and indirect, potable and not-potable reuse water uses.

## 8. Transient Analysis

This proposal does not include Transient Analysis by Quiddity or a sub-consultant of Quiddity. It is Quiddity 's understanding that the City or its Engineer will provide or contract with a firm to provide Transient Analysis of the City's entire pipeline system and provide recommendations to sizing and locations of Air Release / Vacuum Release Valves. If Transient Analysis work is desired to be included with this Project, Quiddity can provide additional scope, compensation, and schedule by separate authorization.

Mr. Brandon Pritchett Page 6 August 10, 2022

#### 9. Applications for Grant or Loan Funding

This proposal does not include completing or submitting applications for grant or loan funding. Instead, the proposal identifies potential funding strategies and opportunities including grant or loan funding and establishes steps and timelines required for applications. If the City desires Quiddity to assist with, complete or submit applications for grant funding, Quiddity can provide additional scope, compensation, and schedule by separate authorization.

### 10. Development of Reclaimed Water Ordinances or Rules and Regulations

This proposal does not include development of Reclaimed Water Ordinances or Rules and Regulations. If the City desires Quiddity to assist with, create, or coordinate these items, Quiddity can provide additional scope, compensation, and schedule by separate authorization.

## 11. Other Additional Engineering Services

This proposal does not include the following items, but they may be needed for the project: alignment alternatives analysis, water quality evaluations, Preliminary Engineering Report(s), Environmental investigations, studies, surveys, or permitting, value engineering, multiple bidding packages or rebidding of the work. Should any of these services be deemed necessary, Quiddity can provide additional scope, compensation, and schedule by separate authorization.

## SERVICES PROVIDED BY THE CITY:

The following services with be provided by the City and the City's Agents:

- Digital copies of all Reports referenced hereon and/or applicable to the project.
- Digital copies of data files relevant to the project.
- Timely review of interim submittals, with legible written comments.

Mr. Brandon Pritchett Page 7 August 10, 2022

#### COMPENSATION

Compensation for the SERVICES described above will be on a LUMP SUM BASIS as follows and further detailed on enclosed **Exhibit A.** 

SERVICES	Lump Sum Compensa	<u>ation</u>
1. Identify Potential Customer Profile		\$21,250
2. Screening-Level Alternative Development and Eval	uation	\$15,255
3. Identify Growth Planning and Incentive Structures		\$17,875
4. Reclaimed Water System Modeling and Project Im	plementation Phasing	\$34,000
5. Reclaimed Water Master Plan Update Report and	Council Assistance	\$25,390
6. Project Management Services		\$35,030
Total Compensation		\$148,800

## **PROJECT SCHEDULE**

Quiddity will complete the scope of services within 340 calendar days from Notice to Proceed as described in **Exhibit B.** 

Mr. Brandon Pritchett Page 8 August 10, 2022

#### SPECIAL CONSIDERATIONS

This proposal is based on the following special considerations:

- 1. All work under this proposal shall be subject to the enclosed *Professional Services Agreement* between Quiddity Engineering, LLC and the City of Pflugerville.
- 2. The proposed fees shall be considered in their entirety for the scope of services. Should you wish to contract with us for only a portion of the work, we reserve the right to negotiate individual scope items on their own merits.
- 3. This proposal shall be valid for sixty (60) days from this date and may be extended upon approval by this office.

We thank you for the opportunity to submit this Proposal and look forward to working with you. An executed copy of this proposal will serve as our notice to proceed. Please return a signed copy to our office. Should you have any questions, please call 713.777.5337.

La X

Kyle H Kaspar, PE Project Manager

Sincerely,

Folloullu
