Notice, City may terminate this Agreement as of the date provided in the notice, in whole or in part, upon the occurrence of one (1) or more of the following events, each of which shall constitute an Event for Cause under this Agreement:

7.3.1 The sale, transfer, pledge, conveyance or assignment of this Agreement without prior approval, as provided in Article XII. Assignment and Subcontracting.

7.4 *Defaults With Opportunity for Cure.* Should Consultant default in the performance of this Agreement in a manner stated in this section 7.4 below, same shall be considered an event of default. City shall deliver written notice of said default specifying such matter(s) in default. Consultant shall have fifteen (15) calendar days after receipt of the written notice, in accordance with Article VIII. Notice, to cure such default. If Consultant fails to cure the default within such fifteen-day cure period, City shall have the right, without further notice, to terminate this Agreement in whole or in part as City deems appropriate, and to contract with another consultant to complete the work required in this Agreement. City shall also have the right to offset the cost of said new Agreement with a new consultant against Consultant's future or unpaid invoice(s), subject to the duty on the part of City to mitigate its losses to the extent required by law.

Failure by Consultant to submit its claims within said forty-five (45) calendar days shall negate any liability on the part of City and constitute a **Waiver** by Consultant of any and all right or claims to collect monies that Consultant may rightfully be otherwise entitled to for services performed pursuant to this Agreement.

7.8 Upon the effective date of expiration or termination of this Agreement, Consultant shall cease all operations of work being performed by Consultant or any of its subcontractors pursuant to this Agreement.

7.9 *Termination not sole remedy.* In no event shall City's action of terminating this Agreement, whether for cause or otherwise, be deemed an election of City's remedies, nor shall such termination limit, in any way, at law or at equity, City's right to seek damages from or otherwise pursue Consultant for any default hereunder or other action.

Further, any failure of either Party to insist in any one or more cases upon the strict performance of any of the covenants of this Agreement, or to exercise any option herein contained, shall in no event be construed as a waiver or relinquishment for the future of such covenant or option. WATER LINES REHABILITATION  
SCOPE OF SERVICES AND COMPENSATION**

**1) PROJECT DESCRIPTION**

The City of Pflugerville has identified a need for engineering support services for addressing the City's needs for conditional assessment services for City owned water lines. Some of these water lines are critical to the City's operations and unplanned outages may create hardships for the City and its residents. Furthermore, some parts of the existing system provide little to no redundancy.

The table below details the rehabilitation project segments identified in the February 2020 Water Master Plan. These segments will be further evaluated and prioritized through collaboration with City of Pflugerville staff during Phase I. Evaluation and prioritization are described further in the following sections of this proposal.

CobbFendley will provide engineering support to the City of Pflugerville for condition assessment services for 12 water line projects as determined by the February 2020 Water Master Plan developed by Others. This scope of services is for the initial Phase I of the project as described below:

1. Phase I – Two (2) meetings with Public Works personnel to develop the final list of projects, using this scope as a limit. Evaluation of Record Drawings, Master Plan, and NDT technologies and, 2 meetings with Public Works personnel. Recommendations of this phase will include type of NDT application to use for each water line segment. It is possible some segments evaluated will have recommendations for rehabilitation or replacement rather than NDT.

**2) PHASE I SCOPE AND DELIVERABLES**

Much of the work in this phase consists of data acquisition and analysis. This data is sometimes incomplete, or cities do not maintain records of specific types. CobbFendley will evaluate data as it is available.

This scope for Phase I will cover the anticipated tasks below:

A. Record Information Collection and Review

1. Compile, organize and review available record information on the water lines selected for rehabilitation/replacement including as-built drawings, lay schedules and inspection reports. Evaluation of record drawings will include age of the pipe, pipe material, pipe thickness, location of isolation valves, blow-offs, fire hydrants, air release/vacuum valves, and fittings, thrust restraint, profile of the line, soil conditions, backfill and bedding recommendations, etc. Record Information will be made available through the City Project Manager.
2. Review and evaluate recent line repairs and isolation valve testing results.
3. Review water system hydraulic and transient model results (performed by others) and operational history of water system, including recorded flow meter and pressure transducer data.
4. Review cathodic protection testing and installation reports.
5. Validate GIS Data from information encountered during review of records. Recommended GIS data changes will be coordinated with City GIS Department.
6. Conduct Two (2) meetings with Project Manager and City Operators regarding the system reliability, operation and historical repairs. Primary reason for the initial meeting is to gather feedback from City Operations staff, and the primary reason for the second meeting is to confirm findings from evaluation with City Operations. This task includes time for preparation of meeting materials, agenda, meeting, and minutes.
7. Verify record information by field reconnaissance and identify existing conditions. Photos and videos obtained as part of this task will be provided to the City.
8. Perform reconnaissance to determine maintenance needs that may impact line access for NDT testing, and site modifications that may be required for NDT, rehabilitation, or replacement. Photos and videos obtained as part of this task will be provided to the City.

B. Evaluation and Prioritization of Water Lines selected for Rehabilitation / Replacement

1. Perform evaluation of waterlines proposed for rehabilitation. Determine the risk associated with each water line identified based on criteria such as risk and consequence of failure, pipe material, age, historical repair history, pressure, and redundancy. Additional evaluations of community, social, and neighborhood impacts will be evaluated. Prepare a matrix summarizing this data.
2. Develop a prioritization schedule of water line sections for preliminary conditional assessment, types of rehabilitation or replacement methodology best suited for existing conditions. Schedule will be based on weighted scores of the criteria evaluated in Task B. 1. An explanation of what criteria cause high ranks for a given segment will be noted.
3. Provide short-term and long term "next step" recommendations for proceeding with non-destructive testing, rehabilitation, or replacement of water lines. A recommendation will be provided for appropriate cost-effective methods for rehabilitation or replacement of water line segments.
4. Work with the Project Manager to develop, recommend and prioritize sections for non-destructive testing. Recommendations will be coordinated prior to issuance of final report.
5. Prepare operation recommendations for isolating each segment.
6. Prepare budgetary estimates and preliminary timeline for the recommended testing.

7. Coordinate City Capital Improvements Plan with the Master Plan recommended water lines to identify potential conflicts.
8. Prepare Technical Memorandum to document methodology, prioritization schedule, and evaluation. Memo will include budgetary estimates and a preliminary schedule for future actions recommended. Documentation including site visit photos will be included in the tech memo.

Deliverables:

Engineering Report that includes the following:

- Summary of Findings of Record Information Collection and Review
- Prioritization Matrix of Master Plan Segments.
- Methodology, Prioritization and Evaluation memo.
- Budgetary Estimate and Schedule for recommended assessment, rehabilitation, or replacements as determined as part of this Phase.
- Exhibits of anticipated NDT investigations and rehabilitations.

C. Non-Destructive Testing (NDT) Technology Assessment and Support Plan

1. Provide recommendations as to methods best suited to investigate and/or evaluate the condition of existing water lines for each water line segment identified as a priority for condition assessment.
2. Identify initial accessibility issues and considerations for entry points into lines for NDT equipment.
3. Develop scope to perform NDT testing, including identifying the recommended limits of inspection, entry points, and field modifications for the prioritized line segments from the Master Plan.

Deliverables:

- Technical Memo summarizing NDT testing technologies and recommended scope for testing with identified accessibility issues.

D. Project Management and Meetings

1. Project Management for 12 weeks to include team management, invoicing, status reports, and schedule updates.
2. Attend Kick-Off and Progress Meetings with Project Manager and City Staff.
3. Present study findings to Project Manager and City Engineer.

### 3) SCHEDULE

The anticipated time of completion for Phase I of the Project is 12 weeks from the date of the Notice to Proceed.

### 4) COMPENSATION

CobbFendley proposes to perform the above tasks for Phase I for a not to exceed amount of **\$95,000.00**. Work will be invoiced monthly on a time and materials basis.
