Re: Highland Park Wastewater Interceptor– Recommendation for Award
KHA No. 069228910

Dear Ms. Patricia Davis:

A total of five bids were received and opened on August 26, 2021 at 3pm for the City of Pflugerville's Highland Park Wastewater Interceptor project. The bid form included a base bid, three additive alternates, and one deductive alternate. The engineer's opinion of probable construction cost for the project was \$2,670,000. In consideration of potential delays and cost escalation due to material shortages caused by COVID-19 and other factors, the standard City of Pflugerville Instructions to Bidders was modified. Bidders were required to provide a schedule and obtain a letter from their respective material suppliers for wastewater pipe with projected material lead time from submittal of a purchase order.

All the bids were evaluated based on the Base Bid and the Base Bid + Alternatives options provided in the bid package. The four (4) alternatives were included to address potential material availability and schedule impacts, cost savings, and remobilization if required due to downstream projects. These alternates were:

- Additive Alternate No. 1 (A1) which substitutes 24" Fiberglass Reinforced Pipe (FRP) for 24" Polyvinyl chloride (PVC) Pipe,
- Additive Alternate 2 (A2) which includes remobilization for lift station decommissioning, if required due to downstream project schedules,
- Additive Alternate 3 (A3) which substitutes 36" FRP in lieu of 33" FRP, and
- Deductive Alternate 1 (D1) which includes open cut rather than trenchless near the Highland Park Lift Station, if field conditions allow this method.

The low bidder, based on the Base Bid and Alternatives, was Cedar Hills Construction, LLC (Cedar Hills). Upon review of the bids, and in accordance with the City of Pflugerville Instructions for Bidders, the low bidder is recommended to be rejected. Cedar Hills has limited relevant project experience as they are a new company (circa 2021). They do not have experience completing projects with the City, constructing wastewater interceptor projects of this size and material, nor completing contracts above \$260,000. Additionally, Cedar Hills did not use the City of Pflugerville provided Bid Bond. Per the Instructions to Bidders Section 5, Rejection of Proposals, "Proposals containing any omission, alteration of form, additions or conditions not called for, incomplete bids, or proposals otherwise regular, but that are not accompanied by acceptable bid security will be considered irregular and may be rejected. In any case of ambiguity or lack of clearness in stating the prices in the proposal, the Owner reserves the right to consider the most advantageous construction thereof, or to reject the proposal. Unreasonable or unbalanced unit bid prices will be cause to reject any proposal." Following City coordination, it is recommended that the Cedar Hills bid be rejected, as they did not include the correct bid bond form and lack comparable project experience.

D Guerra Construction was the second lowest bidder based on the Base Bid and third lowest based on the Base Bid + Alternatives. This bid was found to be accurate and complete. They provided a schedule time of 180 days which based on the material suppliers extended lead times appears to be appropriate.

PGC General Contractors, LLC (PGC) was the third lowest bidder based on Base Bid and second lowest based on the Base Bid + Alternatives. In accordance with the Instruction for Bidders Section 5, referenced above, and based on coordination with City Staff, it is recommended that the PGC bid be rejected, as they did not provide all the documents required with their bid package in accordance with Addendum #2. PGC did not include the required letters from the material suppliers with their sealed bid and they submitted a contractor work schedule with the NTP beginning on September 1, 2021 rather than the given date of October 12, 2021.

Based on an evaluation of all bids received and the information provided above, Kimley-Horn recommends the City award the **Base Bid, Additive Alternate 1, Additive Alternative 2, Additive Alternate 3, and Deductive Alternate 1 to the lowest and most responsive bidder, D Guerra Construction for an amount not to exceed \$2,168,090.00.** Please note, Additive Alternate 1 and Deductive Alternate 1 offered potential contract savings but were not subtracted from the recommended award amount as these items are intended to be evaluated based on field conditions and material lead times with the awarded Contractor. The complete bid tab with all bid results is attached for reference.

If you have any questions or comments, please contact me at the phone number or email provided below.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.
