Re: Updated Water and Sewer Utility Tariffs for SWWC Utilities, Inc. dba:
Windermere Utility Company, Inc. – Water CCN 11471 and Sewer CCN 20542

Dear Mr. Wade:

We are submitting to the City for approval updated water and sewer tariffs. These tariffs have the new monthly base fees and gallonage charges that went into effect October 1st per the Water and Sewer Rate Stabilization Agreement with the City. All other fees such as tap fees and reconnection fees did not change. It is our intent to follow the policies and rules within the tariff immediately upon approval.

The sections on Service Rules and Regulations and Extension Policy have been changed and updated to be compatible with the format and content of the tariffs for our other utilities and the current rules of the Public Utility Commission (PUC). Among other changes the water tariff contains new provisions that reflect the latest Texas Commission on Environmental Quality (TCEQ) requirements for customer service inspections and other system safeguards. The sewer tariff contains provisions to protect against the discharge of non-standard wastes into our facilities. We also attached as Appendix A our current application for service and our updated User Drought Contingency Plan which has previously been filed with the City.

We respectfully request that the City approve these tariffs as submitted. Please let me know if you have questions or need additional information.

Sincerely,

Gary Rose
Director of Operations
