

MIXED-USE NEIGHBORHOOD

Mixed-Use Neighborhood development incorporates different uses such as office, retail, commercial and residential in one area. Mixed-use development can be either vertical or horizontal. Vertical mixed-use describes a single structure with multiple uses within the structure. Typically retail or office is located on the ground floor while residential or office utilizes the upper floors. Horizontal mixed-use describes multiple uses next to each other in a single development or in close proximity. Uses can be located within a single structure, or in separate buildings adjacent to each other. These developments are intended to encourage users to not rely on vehicles and promote a pedestrian friendly experience. By mixing uses and having them in proximity, developments are more walkable than traditional suburban commercial development. These types of developments generally, incorporate amenities like plazas, public seating, and pedestrian features.
