

A large, stylized logo in the background, consisting of two interlocking, rounded shapes. The left shape is a darker blue, and the right shape is a lighter blue. They overlap in the center, creating a white space. The overall shape is roughly square with rounded corners.

CITY OF PFLUGERVILLE

FY2025 - FY2029

CAPITAL IMPROVEMENT PLAN

PFIRST

CORE VALUES

★ **Positive**

We approach all that we do with a positive attitude. We work together, encourage one another, provide constructive feedback, and find solutions that have a positive impact on the community.

★ **Forward-Thinking**

We seek to be leaders in our profession through lifelong learning, innovation, continual process improvement, and development of new and creative solutions and services.

★ **Integrity**

We serve with integrity and inspire trust through our honest, ethical, and transparent actions.

★ **Resilience**

We adapt, overcome, and persevere when difficulties arise through our shared commitment to each other and to our community.

★ **Service**

We serve with compassion, empathy, equity and professionalism. We continually look for ways to improve the quality of services and find efficiencies that increase our capacity to serve.

★ **Teamwork**

We are stronger together. Regardless of position or department, we work together and support each other as one team in a collaborative, inclusive, empowering, and respectful way to achieve the goals of the organization.

Pflugerville Strategic Plan

2021-2025

The Strategic Plan is the guiding document that outlines goals and objectives for the City of Pflugerville. City Council identified four key themes to serve as the foundation of the 2021-2025 Strategic Plan. These themes are:

SAFETY

**ECONOMIC
DEVELOPMENT**

INFRASTRUCTURE

SERVICES

These themes helped us determine four main goals to address over the next five years. By pursuing these, we will be better positioned to provide impactful programs and services to our residents for decades to come. Our four main goals are:

- Become the **safest city** in Texas
- Develop economically to create a **fiscally-sustainable** city with high quality of life
- Maintain and prepare a **robust, resilient infrastructure** that exceeds expectations
- **Engage the community** through vibrant parks and recreation and library programs and services

Taken as a whole, these actions not only change *what* we do, but impact *how* we do it.

MISSION

Pflugerville fosters high quality of life, economic opportunity and a sustainable and diverse community.

VISION

Our vision is to be a dynamic, regional leader by offering a safe, welcoming and inclusive city with a strong sense of community that attracts a talented workforce and desirable businesses.

FY2025-FY2029 CAPITAL IMPROVEMENT PLAN

I. CIP OVERVIEW

The Capital Improvement Program (CIP) Plan is a multi-year planning document designed to identify, prioritize, and track the progress of capital projects with estimated costs over \$50,000. The 5-Year CIP Plan is updated annually to identify and prioritize the City's capital investments and focuses primarily on infrastructure, facility needs and quality of life projects. The first year of each 5-Year CIP cycle is adopted as part of the annual budget process and the four subsequent years are included for planning purposes such as changing priorities, growth requirements, and limited financial resources. Through long-range planning, the City can strategize to provide resources necessary to support growth of the community and position the program to partner with other agencies to support key initiatives and maximize funding opportunities. The CIP is based on the foundation of the City's Strategic Plan, Aspire 2040 Comprehensive Plan, and various Master Plans. The CIP Plan is created with resident and City department input and is reviewed and refined by the City's Planning and Zoning Commission. It is presented to the City Council in May as part of the annual Operating and CIP budget process.

The CIP Plan includes project specific information containing scope, description, and project justification. Items such as calls for service, preventative maintenance, infrastructure condition, facility analysis, and planned new growth and development are considerations for project inclusion.

The CIP Plan identifies a variety of possible funding sources ranging from operating budgets (which are funded by property taxes, special purpose districts, revenues for services, and state and federal grants) to voter-approved bond programs. This 5-Year CIP Plan includes proposed projects and expenditures for Fiscal Years 2025 through 2029 (FY25-FY29). Project costs identified in the CIP Plan are gathered from multiple sources including master planning documents, engineering cost estimates and bid prices for similar projects. Project costs are updated yearly to account for inflation, cost escalation and changing market conditions. Specific project costs are further updated as scopes are finalized, and the project moves closer to a start date. Several factors can affect scheduling of a project including the size of a project, complexity of design, environmental findings, property acquisition and utility relocations. Proposed project costs and schedules are estimates based on best available information at the time the plan is developed.

The goals of a CIP Plan include:

- Timely repair and replacement of aging infrastructure
- Plans for new infrastructure to meet demands for growth
- Provide a high level of certainty for residents, business and developers regarding location and timing of public investments
- Identify the most economical means of financing capital improvements
- Ensure the patterns of growth and development are consistent with the comprehensive plan
- Balance desired public improvements with the community's financial resources
- Provide an opportunity for public input in the City's Capital Improvement development process

LIFE CYCLE OF A CAPITAL IMPROVEMENT PLAN

CITY CHARTER REQUIREMENT

The City's Charter requires the Planning and Zoning (P&Z) Commission to submit a 5-year Capital Improvement Plan to the City Council and City Manager at least 120 days before the beginning of the budget year starting October 1. The plan must include a prioritized list of projects that are programmed with recommended funding sources and year of project start.

CAPITAL PROGRAM

The Capital Improvement Program coordinates short and long-range general plans with growth, public and private development, and the annual budgetary process. The CIP attempts to achieve the goals and objectives of the City's residents, a variety of boards and commissions, and City Council. The CIP carries the following primary benefits:

- Focuses attention on City-wide priorities and citizen expectations
- Provides an implementation framework for the Strategic Plan and Visioning Reports
- Fosters inter-departmental coordination of City infrastructure investments
- Promotes accountability for the long-term planning and investment of public funds for large-scale public purposes

DEVELOPMENT AND ADOPTION OF THE CIP

The development of the City's CIP Plan is an ongoing process. While the document covers a five-year planning perspective, it is revised every year to accommodate new projects, changes in project costs, reflect changes in project scopes and changing program timelines.

The first year of the plan is incorporated into the annual budget to appropriate funds. Improvements identified in subsequent years are approved only on a planning basis, indicating upcoming and future priorities and funding needs and do not receive expenditure appropriation. Cost estimates for years two through five are for planning purposes to be used in conjunction with the City's long-range financial plan.

Projects included in the 5-year CIP are either city-managed projects or include the city's cost share of projects that are part of collaborative planning and delivery efforts between agencies. These projects may be managed by other entities and include other federal or state funding to maximize project delivery. If an outside agency contributes funding directly to the City for a City-managed project, then cost and funding are included in the project budget. The 5-Year CIP includes all capital projects, which are to be financed in whole or in part from funds subject to control or appropriation by the City.

II. PROJECT FUNDING

Funding is an integral component in capital project prioritization. There are several different funding sources for capital improvement projects including, but not limited to, the following:

- Certificates of Obligation (CO) – a bond secured by property tax, or other taxable sources, that only requires City Council approval.
- General Obligation Bond (GO) – a bond requiring approval of City voters as debt service is financed by the credit and taxing power of the issuing jurisdiction.
- General Fund (GF) – the largest fund within the City, the GF accounts for most of the City's financial resources. General Fund includes sales taxes as a revenue source, licenses and permits, local taxes, service charges, and other types of revenue.
- Utility Fund (UF) – the UF funds projects from the sale of water and wastewater services, utility impact fees and issuance of bonds.
- Impact Fees – a charge or assessment imposed by a political subdivision against new development to generate revenue for funding or recouping the costs of capital improvements or facility expansions necessitated by and attributable to the new development.
- Developer-Funded – projects may be funded as part of a development or performance agreement and through capital impact fees for new development. Developer-funded projects may or may not be managed by City staff.
- Tax Increment Reinvestment Zone (TIRZ) – a municipality makes an area eligible for tax increment financing by designating a reinvestment zone, also called a tax increment reinvestment zone (TIRZ) or a tax increment financing (TIF) zone.
- Community Development Block Grant (CDBG) – provides annual grants, on a formula basis, to entitled cities and counties to develop viable urban communities by providing decent housing and a suitable living environment, as well as expanding economic opportunities, principally for low-and moderate-income persons.
- Capital Area Metropolitan Planning Organization (CAMPO) – the Metropolitan Planning Organization (MPO) for Bastrop, Burnet, Caldwell, Hays, Travis, and Williamson Counties. MPOs are federally required throughout the country in areas with a population of 50,000 or more and are required to produce a 20+ year transportation plan, the Regional Transportation Plan (RTP) and a four-year planning document.

- Clean Water State Revolving Fund (CWSRF) – a program that is authorized by the Clean Water Act as a federal and state partnership that provides low-cost financing for a wide range of water quality infrastructure projects for planning, acquisition, design, and construction of wastewater, reuse, and storm water infrastructure.
- Drinking Water State Revolving Fund – a program through the Safe Drinking Water Act for water system improvements.
- Environmental Protection Agency – provides funding through the Water Infrastructure Finance and Innovation Act of 2014 (WIFIA) established the WIFIA program, for eligible water and wastewater and storm drainage infrastructure projects.
- Texas Water Development Board (TWDB) – provides financing and/or grants to local governments for water supply projects; water quality projects including wastewater treatment and non-point source pollution control; flood control and mitigation projects; agriculture water conservation projects; economically distressed, rural, and small community water and wastewater projects; and expenses related to creating groundwater conservation districts.
- Texas Public Improvement District (PID) – an area established to provide specific types of improvements or maintenance which are financed by assessment against the property owners within the area.
- Private Public Partnership (P3) – a collaboration between a government agency and a private company that can be used to finance, build, and operate projects, such as public transportation networks, parks, and convention centers.
- State Infrastructure Bank -- provides innovative financing methods for transportation infrastructure and allows borrowers to access capital funds at or below market interest rates.
- TxDOT Transportation Alternatives – a program (including available and anticipated future funds) for cyclist and pedestrian infrastructure and planning.
- FEMA Hazard Mitigation Grant Program – project funding for eligible mitigation activities that protect life and property from future disasters damage to build a more resilient nation. The program provides funds for state, local, tribal, and territorial governments on the application and grant processes through four grant programs.

III. CIP CATEGORY SUMMARIES

GENERAL FUND CIP: This section describes the General Fund Capital Improvement Programs in the FY2025-2029 timeframe primarily composed of core infrastructure and essential functions including drainage, facilities, parks, transportation, and technology.

DRAINAGE: The Drainage program totals over \$45M with ten (10) projects. The basis for projects is the draft Drainage Master Plan (DMP) and Drainage Rate Feasibility Study. The comprehensive DMP includes proposed capital projects and a proposed Drainage Utility Rate necessary to support implementation of projects. Several drainage requirements are a component of this program, and they address the need to plan for regional detention while reducing the impact to residential and commercial areas of the City. Key drainage projects include emphasis on reducing floodplain impacts and creating detention and channel improvements.

FACILITIES: The Facility program totals over \$267M, with eight (8) projects. A new City Hall is included, as well as a Public Works Complex, as outlined in the Public Works Master Plan. A City-Wide Facility Master Plan and Facility Condition Assessment is included to provide a comprehensive planning document that analyzes current conditions and envisions future needs to improve City services and updates to existing City buildings and facilities. The Americans with Disability Act (ADA) Transition plan is included, as the City maintains a commitment to this implementation in a timely manner.

PARKS: The Parks program totals over \$175M, with twenty-four (24) projects. The 2020 Park Bond projects are included, alongside planned and proposed projects that were identified from early drafts of the ongoing Parks and Recreation Master Plan. The City of Pflugerville Parks and Recreation System offers more than 50 miles of hike and bike trails and is on a mission to become the Trails Capital of Texas. The Parks projects have been presented to the Parks Commission. Key projects are the Multi-Generational Recreation Center, 1849 Park Phase 2, along with several Lake Pflugerville Park projects, and various projects to construct, maintain, and upgrade neighborhood parks.

TRANSPORTATION: The Transportation program totals over \$725M with forty-eight (48) projects. The projects listed represent a balanced approach to maintain, repair, and rebuild existing roadways, improve congestion by targeting intersection improvements, and implement key new roadway projects as identified in the Transportation Master Plan. Several large-scale projects to improve FM 685 Corridor, Main Street and East Pecan are included with associated costs that will require resourceful funding approaches. The City will be seeking additional funds through state and federal funding via the Texas Department of Transportation, Capital Area Metropolitan Planning Organization, Travis and Williamson Counties, and partnerships with the development community.

TECHNOLOGY: The Technology program has no (0) proposed projects for FY25.-29. This category will remain for future City growth and expansion and will be re-evaluated in the next 5-year CIP Plan for upcoming projects.

UTILITY FUND CIP: The following categories describe the Utility Fund Capital Improvement programs in the FY2025-2029 timeframe, with critical infrastructure identified in Reclaimed Water, Water, and Wastewater programs. The City is making major investments in drinking water, wastewater reclamation and treatment. The investments are sizeable and will position the City for continued economic growth and stability, with resilient and robust infrastructure to serve residential and commercial development.

RECLAIMED WATER: The Reclaimed Water program totals \$15M with two (2) projects. With growth of communities and rapidly shrinking supplies of potable water, many municipalities are looking to alternative sources of water to adequately plan for their future. Growth and development within the City of Pflugerville affords an opportunity to plan, design and implement efficiencies for environmental options such as Reclaimed Water. Reclaimed water as a resource has received renewed focus and funding agencies place priority on efforts that include a focus on this resource. The Reclaimed Water Master Plan outlined the CIP projects identified in this program, which are to deliver this resource to 1849 Park and along Weiss Lane, adding to the system that currently serves Travis County Northeast Metro Park (NEMP) irrigation of athletic fields.

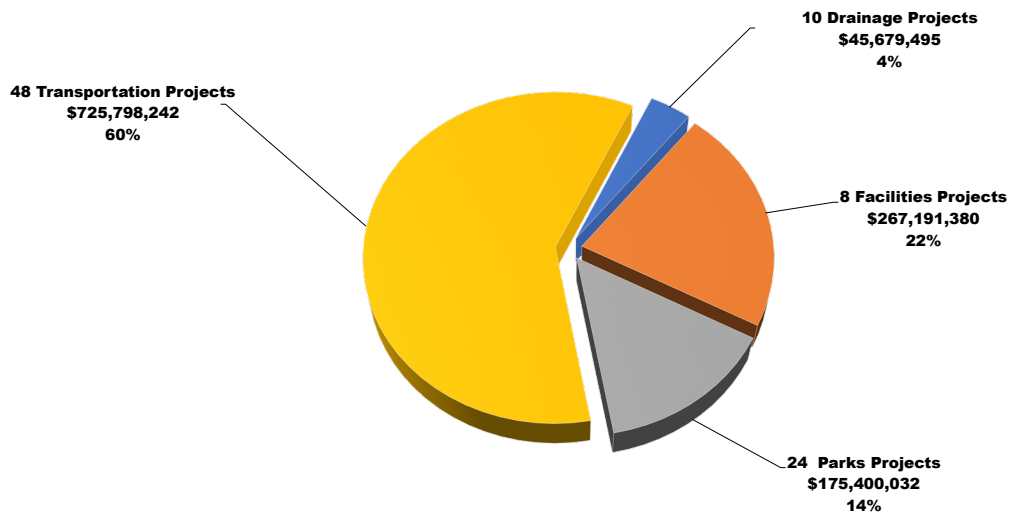

WATER: The Water program totals over \$501M with sixteen (16) projects. Drinking water is continuing to be a valuable resource with increasing scarcity. The program emphasizes both additional drinking water resources and projects to deliver raw water, treat additional water and transmit and distribute this resource. Projects included are sourced in the Water Master Plan and include projects to recapitalize existing water mains in neighborhoods, provide transmission to areas of growth and meet system reliability, storage, distribution, or regulation requirements. The key investment over the next three years is the expansion of the Surface Water Treatment Plant, currently under construction. The City of Pflugerville implemented the first Environmental Protection Agency WIFIA funding in the state of Texas and is seeking additional projects to be funded with this program, as well as Texas Water Development Board funding programs.

WASTEWATER: The Wastewater program totals over \$509M with twenty-five (24) projects. Key projects in this program are found in the Wastewater Master Plan, and include the new Wilbarger Creek Wastewater Treatment Plant, Central Wastewater Treatment Plant Expansion Phase 2, and both new and major rehabilitation improvements to several regional lift stations and new sanitary sewer interceptors. These projects are necessary to meet new wastewater connections and require capacity expansion to remain in compliance with TCEQ regulations. The Wastewater Master Plan will also address system strength, reliability, capacity expansion and development growth.

Drainage Utility Implementation and Utility Rate Implementation

Project Number: DR2301
Total Capital Cost: \$480,000.00

Department: General Government
Type: Capital Improvement

Request description:

Develop and implement a drainage utility fee program that will be codified based on impervious cover, and provide a funding mechanism for the city to study, evaluate, construct, operate, and maintain the city's drainage systems and creeks. A drainage utility fee was recommended in the city's Drainage Master-Plan.

Additional Information

Justification To minimize flooding, maintain drainage infrastructure, and address the impacts of existing and ongoing land development , the city needs to maintain a natural and constructed drainage system with ongoing maintenance and projects that include floodplain modifications, detention ponds, and pipe and inlet storm-water systems. This project supports the infrastructure pillar of the Strategic-Plan and Infrastructure Chapter of the 2040 Comprehensive Plan.

Type of Project Other

Downtown Regional Detention Pond(s)

Project Number: DR2401
Total Capital Cost: \$2,300,000.00

Department: General Government
Type: Capital Improvement

Request description:

Develop and implement a downtown regional detention pond plan that includes sizing and preferred locations of the downtown detention ponds. The downtown detention ponds will allow downtown development to maximize the available acreage by not having to build on-site detention.

Additional Information

Justification Regional storm-water detention is preferable to numerous, disconnected and poorly maintained onsite detention ponds. This project aligns with the City Council's Strategic Plan Infrastructure and safety pillars by preparing City Infrastructure for the growth of Pflugerville in a responsible manner.

Type of Project Other

Immanuel Road/Pecan Park at Upper Gilleland Creek Channel Improvements

Project Number: DR2402
Total Capital Cost: \$5,941,700.00

Department: General Government
Type: Capital Improvement

Request description:

Immanuel Rd is currently inundated during the 5-year storm event. The 100-year floodplain extends into the neighborhood south of Upper Gilleland Creek and floods E Pecan St on the north side of the creek. The project includes channel modifications and an embankment to protect E Pecan St from flood inundation.

Total	\$0.00	\$493,460.00	\$4,411,890.00	\$1,036,350.00	\$0.00	\$0.00	\$5,941,700.00

Additional Information

Justification

This project allows Immanuel Rd to be passable during the 10-year storm event, removes 25 homes from the floodplain, and relieves flooding on E Pecan St. This project, as part of the City's Comprehensive Plan, improves storm-water management during major storm events and supports the Infrastructure and Safety pillar of the Strategic Plan. This is the GC-05 project in the city's Drainage Master-Plan.

Type of Project

Other

Caldwell Elementary at Upper Gilleland Creek Channel Improvements

Project Number: DR2403
Total Capital Cost: \$3,006,749.00

Department: General Government
Type: Capital Improvement

Request description:

Caldwell Elementary is currently inundated by Gilleland Creek floodwaters during the 100-year storm event. The scope of the project includes raising Fitzgerald Ln to an elevation of 777 feet, channel modifications and a berm on the eastern border of Gilleland Creek from Fitzgerald to Pond Court.

Capital Costs	To Date	FY2025	FY2026	FY2027	FY2028	FY2029	Total

Total	\$0.00	\$249,730.00	\$2,482,316.00	\$274,703.00	\$0.00	\$0.00	\$3,006,749.00

Additional Information

Justification

This project removes Caldwell Elementary from the 100-year floodplain by changing the floodplain boundaries, creating a passable route on Fitzgerald Lane during the 100- year storm event, and adjusting the floodplain boundaries via channel improvements to remove 29 homes from the floodplain. This is the GC-01 project in the city's Drainage Master-Plan. This project aligns with the city Council's Strategic Plan Infrastructure and Safety components by improving storm-water management during major storm events.

Type of Project

Other

Railroad Avenue at Upper Gilleland Creek Channel Improvements

Project Number: DR2501
Total Capital Cost: \$10,659,206.00

Department: General Government
Type: Capital Improvement

Request description:

Railroad Avenue is currently inundated and not passable during the 2-year storm event. The project includes raising Railroad Avenue at the Gilleland Creek crossing by up to 5 feet, widening the bridge opening by 220 feet, and modifying the channels, including channel benching, downstream of the Railroad Avenue bridge.

Capital Costs	To Date	FY2025	FY2026	FY2027	FY2028	FY2029	Total
Planning/Preliminary	\$0.00	\$0.00	\$887,150.00	\$0.00	\$0.00	\$0.00	\$887,150.00

Total	\$0.00	\$0.00	\$887,150.00	\$7,910,241.00	\$1,861,815.00	\$0.00	\$10,659,206.00

Additional Information

Justification This project will create a passage route on Railroad Avenue during the 10-year storm event, remove 9 homes from the floodplain by changing the floodplain boundaries through floodplain changes, and reduce flood insudation for 12 additional homes. This is the GC-05 project in the city's Drainage Master-Plan. This project aligns with the City Council's Strategic Plan Infrastructure and safety pillars by improving storm-water management during major storm events.

Type of Project Other

Pfennig Lane Intersection N at Upper Gilleland Creek Drainage Improvements

Project Number: DR2502
Total Capital Cost: \$417,186.00

Department: General Government
Type: Capital Improvement

Request description:

The Pfennig Ln and E Pecan St intersection is currently experiencing flooding during heavy rain events. A combination of underground and surface drainage improvements will convey drainage flows to Upper Gilleland Creek. The existing storm drain is not adequately sized to convey flow in the ROW.

Additional Information

Justification This project will create a passable route on Railroad Avenue during the 10-year storm event, remove 9 homes from the floodplain by modifying the floodplain boundaries, and reduce flood insudation for 12 additional homes. This is the GC-06 project in the city's Drainage Master-Plan. This project aligns with both the Infrastructure and Safety pillars of the Strategic Plan by improving storm-water management during major storm events.

Type of Project Other

Swenson Farms at Upper Gilleland Creek Channel Improvements

Project Number: DR2601
Total Capital Cost: \$6,285,602.00

Department: General Government
Type: Capital Improvement

Request description:

Swenson Farms Blvd is inundated and not passable during the 100-year event. The project includes extending the bridge opening by 50 feet in the northern direction, 200 linear feet of channel (including channel benching upstream and downstream of Swenson Farms Blvd), and constructing an embankment on Pfenning Lane.

Additional Information

Justification

The existing City Hall is undersized and consists of several small buildings. Up to 60% of staff are not able to co-locate and work as a unit. Downtown East has included aspirations to leverage the central Pflugerville location to become a mixed-use development with connections to Main Street and the City's hike and bike trail network anchored by the proposed new multi-generational recreation center and new city hall. The new facility is imperative in ensuring community facilities and public services sufficiently fulfill the needs of the community and provide high level service for residents as the city grows, as noted in the Aspire Pflugerville 2040 Comprehensive Plan. This project aligns with the City Council's strategic plan service component by proving a facility that supports a high quality of life.

Additional Information

Justification

The City of Pflugerville ADA Self-Evaluation and Transition Plan was adopted in 2020. This is part of meeting the requirements of the Americans with Disabilities Act (ADA) listed within the Self-Evaluation. The improvements will improve access for mobility-impaired patrons through the installation of ADA-compliant sidewalks and other facilities as noted in the Aspire Pflugerville 2040 Comprehensive Plan Chapter 5, Transportation Goals and Objectives. This project aligns with the City Council's strategic plan safety component.

Additional Information

Justification

A new Public Works Facility is needed as existing facilities for Public Works do not allow enough space for normal everyday activities to provide the level of service that residents demand. Staff have started leasing space in an attempt to provide a standard level of service, but these rental facilities and space are still too small for existing and future staff need to support the City's infrastructure for the next 30 years. Current 5-year staffing levels are expected to be almost 150 FTEs with full employment and a build out of staffing to be almost 250 FTEs. The complex is a plan for future expansion of facilities as noted in the Aspire Pflugerville 2040 Comprehensive Plan. Furthermore, this project is supported by the infrastructure pillar of the Strategic Plan.

Type of Project

Other

City-wide Facility Master Plan

Project Number: FA2307
Total Capital Cost: \$500,000.00

Department: General Government
Type: Capital Improvement

Request description:

The city-wide facility Master-Plan will include the potential reuse of the current City hall building, future plans for the library, PAWS, and police department/justice center. The scope of the effort includes evaluation of existing buildings, identification of solutions for facility inefficiencies, recommendations for renovations and new construction needed with consideration of the City's current land use and locations.

Additional Information

Justification

The report is intended to be a blueprint for the scope of improvements and the timing of when those improvements should be made. The facilities master-plan is noted to be done in the Aspire Pflugerville 2040 Comprehensive Plan implementation plan, section 1.1. This project aligns with the City Council's strategic plan infrastructure and safety components by preparing City infrastructure for the growth of Pflugerville responsibly.

Type of Project

Other

Facilities Condition Assessment

Project Number: FA2402
Total Capital Cost: \$2,350,000.00

Department: General Government
Type: Capital Improvement

Request description:

The facilities condition assessment will be completed in FY24. The assessment will include a detailed condition review of each building envelope system (roof, windows, doors), mechanical, electrical and plumbing systems, and the identification of overall facility condition, code compliance, and recommendations for repair and replacement of building system components. Phase 1 will provide a Facility Assessment deliverable with a "current state of building facilities" which will document deficiencies and needed repairs, cost estimates and prioritization of projects. The Assessment will provide a recommended Capital Improvement Plan (CIP) based on priority and budgets in a five and ten year forecast.

Additional Information

Justification The objective of the Facility Master-Plan is to provide the City of Pflugerville with the necessary information to effectively improve and maintain buildings with consideration to facility conditions, maintain code compliance, and plan for facility repairs and replacements proactively. This project aligns with the City Council's strategic plan infrastructure and services components by maintaining infrastructure to ensure resiliency and operability at all times.

Type of Project Other

Justice Center Expansion

Project Number: FA2701
Total Capital Cost: \$2,053,800.00

Department: General Government
Type: Capital Improvement

Request description:

Expand the Pflugerville Justice Center from the west wall to the parking lot.

Gilleland Creek Pool Facilities Project

Project Number: PA1601
Total Capital Cost: \$1,777,096.00

Department: General Government
Type: Capital Improvement

Request description:

Improvements to the two existing Gilleland Creek park structures and construction of climate-controlled restroom, shower and changing facility, including construction of a new climate-controlled lifeguard office with ticketing and concession facility and improved landscaping and hard-scapes. In 2024, additional shade structures are planned to account for existing shade that was removed to make room for construction.

Additional Information

Justification

The project will provide improved accessibility, safety and efficiency for the facility patrons. Additionally, the new facilities will provide a lifeguard recovery area, improving the health and safety of City staff. The addition of a lower shade structure over the pump system is identified in the 2023 Parks and Recreation Open Space Master-Plan, Outdoor Swimming Pool Assessment compiled by Water Technologies, Inc. This upgrade will extend the life of the pump system and will be funded in FY24. Additionally, the project meets Goal 5 of the Aspire 2040 plan, which is to "Ensure parks and recreation facilities and programming meet the needs of the community as the City grows." This project aligns with both the Infrastructure and Service pillars of the Strategic Plan.

Athletic Fields Feasibility Study

Project Number: PA2405
Total Capital Cost: \$200,000.00

Department: General Government
Type: Capital Improvement

Request description:

We have 33 acres of ball fields and we received over 45 acres of request every year. We need to do a feasibility study so we can survey the public on their needs for the next 10 to 15 years and start to plan on parcels of land to target for potential purchase. Our last athletic field feasibility study was in 2014.

Additional Information

Justification

In November 2020, Pflugerville voters approved \$42.3 million in bonds for Parks and Recreation projects. 1849 Park, Phase 2 is one of the identified park projects. These improvements were identified in 2016 by the community through the public engagement phase of the 1849 Master Planning process. This project aligns with the City Council's strategic plan service component by planning for the future of Parks and Recreation Services for current and future residents and implementing facilities that support a high quality of life. Additionally, the project meets goal 5 of the Aspire 2040 plan, which is to "Ensure parks and recreation facilities and programming meet the needs of the community as the City grows."

Additional Information

Justification

In November 2020, Pflugerville voters approved \$42.3 million in bonds for Parks and Recreation projects. The destination play-space was one of the identified projects. The imaginative concepts will create a one of a kind experience that will be a focal point for the community and an indispensable gathering space that can benefit everyone. This project aligns with the City Council's strategic plan service component by planning for the future of Parks and Recreation Services for current and future residents and implementing facilities that support a high quality of life. Furthermore, the park will support Goal Number 7 in the Aspire Pflugerville 2040 Comprehensive Plan to ensure parks and recreation facilities and programming meet the City-sponsored events and gatherings meet the needs of a diverse community as the City grows.

Additional Information

Justification

In November 2020, Pflugerville voters approved \$42.3 million in bonds for Parks and Recreation projects. Kelly Lane Park is one of the identified underserved areas of the city in need of neighborhood park development. This project aligns with the City Council's strategic plan service component by planning for the future of Parks and Recreation Services for current and future residents and implementing facilities that support a high quality of life. Furthermore, the park will support Goal Number 5 in the Aspire Pflugerville 2040 Comprehensive Plan to ensure parks and recreation facilities and programming meet the needs of the community as the City grows.

Type of Project

Other

Multi-Generational Recreation Center Project

Project Number: PA2011
Total Capital Cost: \$101,270,074.00

Department: General Government
Type: Capital Improvement

Request description:

Design and construction of a new 120,000 square foot multi-generational recreation center. To include four basketball courts, a fitness floor, a group exercise and multipurpose space, child watch and aquatic features including a leisure pool, lap lanes and a dry sauna.

Additional Information

Justification

As Pflugerville continues to grow with residential and commercial development it is imperative that we invest in the preservation of park land, including natural green space for the community to enjoy. This project aligns with the City Council's strategic plan service and infrastructure pillar component by planning for the future of Parks and Recreation Services for current and future residents and implementing facilities that support a high quality of life. This will support Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.8, prioritize the acquisition of land for the development of parks, trails, and amenities in areas that are underserved.

Justification Trails are an alternative option for travel through the city. The replacement of natural surface trails with paved trails is imperative in ensuring accessibility and connectivity of parks, schools and community facilities as noted in the Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.2. Furthermore, this project supports our efforts towards becoming the Trail Capital of Texas and meeting ADA/PROWAG standards. This project aligns with both the Infrastructure and Service pillars of the Strategic Plan.

Type of Project Other

Annual Trail Connectivity

Project Number: PA2306
Total Capital Cost: \$1,710,000.00

Department: General Government
Type: Capital Improvement

Request description:

Trail connectivity and anticipation of new gaps created by development as the city grows. Supporting our efforts towards becoming the Trail Capital of Texas.

Historic Elevated Tank Park Site

Project Number: PA2401
Total Capital Cost: \$1,700,000.00

Department: General Government
Type: Capital Improvement

Request description:

This project encompasses the rehabilitation and beautification of the historic water tank property, making it a gathering place to be enjoyed by the community. The future site would incorporate educational and historical value for the community while incorporating enhancements to Old Town Park including a pathway, seating, added custom historical play features. The first portion of work will be to complete preliminary work to develop a feasible design of park components for this project.

Additional Information

Justification

Lake Pflugerville continues to be a highly visited park within the Pflugerville park system, with over 120,000 visits in FY 22. The beach area improvements would expand usable space within the beach area of the park, supporting the demand, enhancing the user experience and overall creating a safer environment for park patrons. This project aligns with the City Council's strategic plan service and infrastructure pillars by planning for the future of Parks and Recreation Services for current and future residents and implanting facilities that support a high quality of life. Additionally, this project supports Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.4, support efforts to incorporate Pflugerville's history, agricultural heritage and multicultural identity into parks, trails, and facility improvement projects.

Additional Information

Justification

Wells Point Park is a highly used park by Pflugerville residents. The park needs enhancements to keep pace with the demand. The project is supported by the 2014 Parks, Rec and Open Space Master-Plan, Goal 5.3 existing parks will be renovated to increase patronage as well as the Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.9 enhance and revitalize existing parks so that they are better utilized by the public they are serving. This project aligns with both the Infrastructure and Service pillars of the Strategic Plan.

Additional Information

Justification

The addition of the Biehle House project provides a wide array of opportunities for Pflugerville residents to engage in both passive and active recreation and programming. This space would be able to accommodate our growing demand for nature programming, including our pollinator groups, both Monarch City USA, Bee City USA and volunteer groups. This project aligns with the City Council's strategic plan service component by planning for the future of Parks and Recreation Services for current and future residents and implementing facilities that support a high quality of life. Furthermore, this project supports Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.4, support efforts to incorporate Pflugerville's history, agricultural heritage and multicultural identity into parks, trails, and facility improvement projects.

This project aligns with both the Infrastructure and Service pillars of the Strategic Plan.

Additional Information

Justification

Lake Pflugerville continues to be a highly visited park within the Pflugerville park system, with over 120,000 visits in FY23. The additional trail-head would allow for additional opportunities to access the park as it provides a location other than the beach where users can access the park and have support facilities. The trail connectivity outlay is imperative in ensuring accessibility and connectivity of parks, schools and community facilities as noted in the Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.2. This project aligns with both the infrastructure and services pillars of the Strategic Plan.

Type of Project

Other

Trail Corridor Study

Project Number: PA2602
Total Capital Cost: \$300,000.00

Department: General Government
Type: Capital Improvement

Request description:

The 2023 Parks and Recreation Master Plan identified that the department should expand the citywide trail system connections between existing locations. The scope of the Trail Corridor Study would include the entire length from the existing Recreation Center on 400 Immanuel Street, connect to the Downtown East Development, to include the future Recreation Center, and ultimately to Pfluger Park. This Study will explore opportunities and constraints for further developing the active transportation features within the corridor. The study will include an extensive public engagement component, existing conditions analysis, and alternatives development and analysis. The study will identify trail location, amenities, and passive play areas.

Additional Information

Justification Pflugerville is identified as the "Trail Capital of Texas". Based on the master-plan community engagement findings, trails are a top priority for recreation activities in the community. The 2023 Parks, Recreation and Open Space Master Plan identified through community engagement that Trails play a significant role in livability, transit, and wellness in Pflugerville. This project aligns with both the Infrastructure and Service pillars of the Strategic Plan.

Type of Project Other

1849 Park Phase 3

Project Number: PA2701
Total Capital Cost: \$7,950,150.00

Department: General Government
Type: Capital Improvement

Request description:

This portion of 1849 will focus on passive recreation that includes a festival area, playground, amphitheater (2,000 seats), restroom/concession building with covered picnic seating, a large group pavilion programmable outdoor space for outdoor learning, wildflower and prairie preserve, and nature trails, tennis/pickleball courts and a dog park. The dog park will consist of a five acre fenced enclosure that is internally fenced to create several smaller enclosures. Small shade structures, water and wastewater stations may be provided. This phase will also contain a small parking area.

Capital Costs	To Date	FY2025	FY2026	FY2027	FY2028	FY2029	Total

Additional Information

Justification This project would complete the final phase of the 1849 Park master plan that was developed and approved in 2016. This area has been identified as underserved through the 2023 Parks and Recreation Master Plan, the addition of recreational amenities to 1849 Park would increase services for residents that live on the east side of town. Many of the identified amenities have been requested in 2016 during public engagement and again throughout the current 2023 department master plan including the outdoor gathering spaces, dog park and pickleball courts. Additionally, this project supports Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.4, support efforts to incorporate Pflugerville's history, agricultural heritage and multicultural identity into parks, trails, and facility improvement projects.
This project aligns with both the Infrastructure and Services pillars of the Strategic Plan.

Type of Project Other

Lake Pflugerville - Boardwalk Area & Pier Replacement

Project Number: PA2702
Total Capital Cost: \$4,857,600.00

Department: General Government
Type: Capital Improvement

Request description:

This project is identified in the Lake Pflugerville Preliminary Design Report and proposes to weave a boardwalk system into the existing wetlands. Construction would include a boardwalk network on a system of drilled piers and two covered overlooks for wildlife viewing. In addition, we would replace the three existing piers with the same upgraded material.

Additional Information

Justification

Lake Pflugerville continues to be a highly vested park within the Pflugerville park system, with over 120,000 visitors in FY23. The addition of the boardwalk area would allow for park users to safely engage with the flora and fauna with minimal disturbance. This site would provide an educational experience for park users and increase educational programming opportunities. Additionally, this project supports Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.9, to enhance and revitalize existing parks so that they are better utilized by the public they are serving. This project aligns with both the Infrastructure and Service pillars of the Strategic Plan.

Type of Project

Other

Parks, Recreation and Open Space Master Plan

Project Number: PA2801
Total Capital Cost: \$500,000.00

Department: General Government
Type: Capital Improvement

Request description:

Develop a 10-year Parks, Recreation & Open Space Master Plan to guide the future additions and enhancements to our parks, trails, athletic fields, programs, and aquatic and recreation facilities. This plan will help Pflugerville continue to be one of the best places to live in America but only if it reflects the needs and desires of our community.

Additional Information

Justification

This plan will help Pflugerville continue to be one of the best places to live in America, but only if it reflects the needs and desires of our community. A master plan update is needed every 3-5 years. Additionally, this project supports Aspire Pflugerville 2040 Comprehensive Plan implementation plan section 5.1, to develop and maintain a Parks and Recreation Master Plan every 10 years with an update every 5 years, in order to account for any growth and development and plan for the redistribution of equity between parks and open space across the City. This project aligns with both the Service pillar of the Strategic Plan.

Colorado Sand Drive from Copper Mine to Lone Star Ranch Blvd

Project Number: TR1901
Total Capital Cost: \$9,941,901.00

Department: General Government
Type: Capital Improvement

Request description:

Construct approximately 0.53 miles of new roadway to fill the gap in existing Colorado Sand Drive between Copper Mine Drive and Lone Star Ranch Blvd including four lane paved roadway, curb and gutter, underground drainage, water, wastewater and a roundabout.

Additional Information

Justification Filling the gap in existing Colorado Sand Drive between Copper Mine Drive and Lone Star Ranch Blvd will improve traffic flow for the upcoming developments and the Pflugerville ISD Hendrickson High School. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens. This project aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan. Project is partially Developer funded.

Type of Project Other

Kelly Lane Phase 2 from W. Falcon Point to Moorlynch Ave.

Project Number: TR1902
Total Capital Cost: \$27,628,718.00

Department: General Government
Type: Capital Improvement

Request description:

This project will widen Kelly Lane from a two-lane roadway to an urban four-lane divided section from Falcon Pointe Drive to just east of Moorlynch Avenue. Phase 2 will also include drainage improvements and the addition of a roundabout at Vilamoura Street.

Additional Information

Justification

The project includes the widening of an existing 2-lane roadway to a 4-lane roadway with a raised center median and the addition of streetlights. This widening will accommodate future growth and allow for traffic to operate efficiently and safely into the year 2040. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens.

This project aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project

Other

Historic Colored Addition Infrastructure Improvements

Project Number: TR1904
Total Capital Cost: \$10,503,973.00

Department: General Government
Type: Capital Improvement

Request description:

The improvement project includes full reconstruction of each of the existing subdivision roadways along with new construction of Grant Avenue, Lincoln Avenue, Taylor Street, Caldwell's Lane, and Russell Street. All roadways will incorporate curb and gutter, underground storm drain facilities, sidewalks facilities throughout the project, street lights and new water mains with fire hydrants to service the complete subdivision.

Additional Information

Justification

This project aims to correct insufficient street paving, water and wastewater service, to ensure this area of the city can remain viable and functional. This project supports the Safety, Economic Development and Infrastructure pillars of the Strategic Plan.

Type of Project

Other

Melber Lane from Cameron Road to Pleasanton Parkway

Project Number: TR1906
Total Capital Cost: \$28,311,191.00

Department: General Government
Type: Capital Improvement

Request description:

Melber Lane consists of constructing the realignment of Cameron Road and Melber Lane extension from Cameron Road at the City's 1849 Park to Pleasanton Parkway as the northern project limit. Cameron Road is a Travis County long-range transportation project that identifies the transportation needs and solutions of the areas.

Additional Information

Justification

This project will continue Phase 2 improvements on Kelly Lane from Moorlynch Avenue to Weiss Lane/Hodde Lane, and address realignment of the intersection of Kelly Lane/Cele Road and Weiss Lane/Hodde Lane. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Additional Information

Justification To address population growth and meet the Level of Service for the road, project will realign Cameron Road at the intersection of Pecan Street Weiss Lane. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizen as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan. This project is anticipated to be constructed by a developer.

Type of Project Other

E. Pflugerville Pkwy Realignment (Jesse Bohls) E. of Weiss

Project Number: TR2008
Total Capital Cost: \$29,297,009.00

Department: General Government
Type: Capital Improvement

Request description:

This project is the continuation of East Pflugerville Parkway from Weiss to Avaral Avenue. This new segment of roadway will be one mile in length and consist of a 4-lane roadway with a raised center median and the addition of streetlights.

Additional Information

Justification This project is to address population growth and meet the Level of Service for the road. Improvements will allow for greater efficiency for both commercial/industrial vehicles as well as the traveling public. The improvements will allow for safer turning movements at intersections, provide dedicated and safe pedestrian concrete walkway, and mitigate some localized drainage issues. Improvements will also address the current condition of the roadway pavement. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project Other

Immanuel Road Improvements

Project Number: TR2103
Total Capital Cost: \$24,000,000.00

Department: General Government
Type: Capital Improvement

Request description:

Design and full reconstruction for widening of the existing roadway to a three-lane roadway section from Pecan St. to Killingsworth Ln. Improvements include curb and gutter, intersection improvements, street lighting, underground storm infrastructure, and shared use paths.

Additional Information

Justification

Corridor Study is a partnership project between the City and Travis County to develop the best alignment for existing and future developments and travel east-and-west. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan. This project is medium priority in the Transportation Master Plan.

Additional Information

Justification

Project will provide details for development of future transportation infrastructure, to facilitate more efficient and safer routes for cyclists, pedestrians and vehicles to provide a robust infrastructure and benefit the residents of the City of Pflugerville. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project

Other

NB and SB FM 685 at Kelly Lane Intersection Improvements

Project Number: TR2206
Total Capital Cost: \$2,647,869.00

Department: General Government
Type: Capital Improvement

Request description:

Northbound Left-turn and U-turn lane improvements at NB Frontage Road and Kelly Lane & Southbound Left-turn and Right-turn Lane Improvements at Southbound Frontage Road at Kelly Lane. Evaluate the interchange of FM 685 & Kelly Lane for existing and future conditions. Provide solutions that increase capacity, improves operations and safety for vehicles and pedestrians. The project will include an AFA with TxDOT.

Additional Information

Justification

This Project will provide increased safety and traffic operations efficiency for road users at this intersection, facilitate the movement of people, goods, and services in the City. This project provides for additional pavement for turn lane queuing, U turn movements and additional pavement markings to better inform motorists of lane assignments. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project

Other

Justice Center Parking Lot Expansion

Project Number: TR2207
Total Capital Cost: \$2,416,860.00

Department: General Government
Type: Capital Improvement

Request description:

The project will develop a portion of the adjacent property west of the Pflugerville Justice Center for expansion of the existing police department parking lot. The number of parking spaces will be maximized to a goal of at least 78 spaces based on available land area for parking, detention facilities and elevated storage tank construction.

Additional Information

Justification

A pavement condition analysis identified areas of pavement distress and the pavement must be repaired or renewed. The Pavement maintenance program includes minor maintenance activities that remove and renew pavement. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Additional Information

Justification

The corridor study and preliminary engineering of the Project was provided as one of the voter-approved 2020 General Obligation Transportation Bond projects. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan. Project requires toll road revenue loss study and interlocal agreement with City of Round Rock. This project does not have an Opinion of Probable Construction Cost (OPCC) at this time to support the construction numbers provided.

Type of Project

Other

Mobility Master Plan

Project Number: TR2401
Total Capital Cost: \$450,000.00

Department: General Government
Type: Capital Improvement

Request description:

The mobility master plan is intended to provide an update to the existing Transportation Master Plan to reflect adjustments to roadway infrastructure due to growth and the needs of the community, as well as include goals and policies from the Aspire 2040 Comprehensive Plan. In addition, the mobility plan will include a new trails master plan per the direction of the Parks Master Plan.

Additional Information

Justification Prior Traffic Impact Analysis (TIAs) have identified future need for signals at these locations. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project Other

Weiss Lane Widening

Project Number: TR2403
Total Capital Cost: \$500,000.00

Department: General Government
Type: Capital Improvement

Request description:

Expansion of Weiss Lane from E. Pecan to Pleasanton Parkway from two lanes to four lanes with shared use paths on both sides. Includes bridge over Gilleland Creek and intersection improvements at Weiss and Pecan Street. Additional costs will be included in the future as the project progresses through the planning phase.

Additional Information

Justification High traffic volumes currently make turn movements difficult during peak travel hour periods, this project will provide additional safety and capacity at this intersection. This project aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Additional Information

Justification

The intersection provides direct east-west connectivity for residents that live in the nearby Pflugerville and Hutto subdivisions. Due to congestion along the major corridor, residents experience extended delays attempted to enter CR 138 during peak hours. A traffic signal will improve mobility and safety at the intersection. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Additional Information

Justification
Crash events and heavy congestion as traffic backs up and stops along the SH 130 NB exit ramp. Reconfiguration of lanes with a deceleration/acceleration lanes may improve level of service for NB FR (FM 685) traffic. This Project aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project Other

CR 138 Widening (Future Southeast Loop)

Project Number: TR2410
Total Capital Cost: \$1,935,000.00

Department: General Government
Type: Capital Improvement

Request description:

Widening existing 3-lanes to 4-lanes with sidewalk, drainage improvements and traffic signal improvements. This project has been requested as part of Williamson County's bond election.

Additional Information

Justification

There is heavy westbound congestion along CR 138. The Southeast Loop design maintains 1-westbound lane and 2-eastbound lanes in this location. To alleviate congestion, widen roadway to 4-lanes with 2-lanes in each direction. This Project supports the Comprehensive Plan by providing a Safe, Resilient Infrastructure for our citizens as well as aligns with the Safety, Economic Development, and Infrastructure pillars of the Strategic Plan.

Type of Project

Other

Parkway Drive Street Reconstruction and Drainage Improvements

Project Number: TR2501
Total Capital Cost: \$1,470,000.00

Department: General Government
Type: Capital Improvement

Request description:

Reconstruct the roadway into an urban section including pavement, curb, gutter, drainage, sidewalk, and streetlights with local road cross section with potential for a traffic calming improvement. Comprehensive drainage improvements are needed for the area to address current roadside ditches.

Additional Information

Justification

This project will help convert some existing large volume of potable water users to reclaimed water and reduce the City's overall potable water usage. The project will also convert the 1849 Park from using potable water for irrigation to reclaimed water. The line will allow the expansion of the beneficial reuse program to divert unnecessary use of potable water to effluent reuse, as noted in the Aspire Pflugerville 2040 Comprehensive Plan Chapter 6, Section 3.4. Furthermore, this project supports the infrastructure pillar of the strategic plan by preparing the city infrastructure for the growth of Pflugerville responsibly.

Type of Project

Other

Reclaimed Waterline along Weiss Lane

Project Number: RW2501
Total Capital Cost: \$5,671,808.00

Department: Utility

Additional Information

Justification

This project will help convert the largely existing volume of potable water users to reclaimed water and reduce the City's overall potable water usage. The project will also convert Lake Pflugerville Park and Verona Park from using potable water for irrigation to reclaimed water. The line will allow the expansion of the beneficial reuse program to divert unnecessary use of potable water to effluent reuse, as noted in the Aspire Pflugerville 2040 Comprehensive Plan Chapter 6, Section 3.4. Furthermore, this project supports the infrastructure pillar of the strategic plan by preparing the city infrastructure for the growth of Pflugerville responsibly.

Other

Water Treatment Plant Expansion to 30MGD & Pump Station at WTP

Project Number: WA2101
Total Capital Cost: \$199,881,331.00

Department: Utility
Type: Capital Improvement

Request description:

A treatment capacity expansion at the Pflugerville WTP from 20.5 MGD to 30.0 MGD. This project also includes an expansion of the Lake Pump Station (raw water) from 18.0 MGD to 30.0 MGD, and an expansion of the High Service Pump Station from 17.3 MGD to 24 MGD. Parallel 36-inch transmission mains from the Lake Pump Station to the WTP and from the High Service Pump Station to Weiss Lane are included to provide adequate transmission capacity. Build pump station at Water Treatment Plant to serve a new Pressure Zone.

Additional Information

Justification

This project will provide additional water supply to support the future of Pflugerville, as outlined by growth projections and the Water Master-Plan. This project supports the Comprehensive Plan by providing a safe, resilient infrastructure for our citizens. In addition to the alignment with the Comprehensive Plan, it also supports the Safety, Infrastructure and Services pillars of the Strategic Plan.

Type of Project

Other

30-inch SH 130 and Pfluger Farm Lane Water Lines

Project Number: WA2202
Total Capital Cost: \$25,479,500.00

Department: Utility
Type: Capital Improvement

Request description:

30-inch water line along the west side of State Highway 130 from Pflugerville Parkway to FM 685. Includes 30-inch water line along Town Center Drive, and crossing State Highway 45, providing a means to fill the ground storage tank from the Central Pressure Zone. This project should be constructed in three phases, one phase along N SH 130, one phase from N SH 130 to the intersection of the existing 16-inch and 12-inch waterlines and one section from the intersection to the suction side of the SH 45 pump station.

Additional Information

Justification

As these assets were constructed in the 1980's, the pipe is well past its useful life and poses significant risk to the water utility when pipe has breaks or failures. These failures require staff to treat the existing pipe as hazardous material and they protect themselves and the environment from the asbestos that is emitted when repaired. This project supports the Safety, Infrastructure and Services pillars of the Strategic Plan and Comprehensive Plan by providing a safe, resilient infrastructure for our citizens.

Type of Project

Other

Water Line Rehabilitation - Pflugerville Estates

Project Number: WA2408
Total Capital Cost: \$2,946,200.00

Department: Utility
Type: Capital Improvement

Request description:

The water lines in the Pflugerville Estates neighborhood do not satisfy many American Water Works Associations (AWWA) standards as well as City water line standards. Currently, most of the infrastructure is not common pipe size and service lines are PVC and not a polypropylene material. There is only a handful of fire hydrants to serve the entire area and runs the risk of property damage if more fire hydrants are not installed to meet AWWA standards.

Additional Information

Justification

This project will create reliability in the neighborhood systems by adding additional connections that can supply water. Replace all lines that are PVC and age range 1977-1984 and satisfy City hydrant requirements. This project supports the Comprehensive Plan by providing a safe, resilient infrastructure for our citizens. This project supports the Safety, Infrastructure and Services pillars of the Strategic Plan and Comprehensive Plan by providing a safe, resilient infrastructure for our citizens.

Additional Information

Justification

The City last completed a water master plan in 2020. With changing demands and significant growth over the years, an update to the water master plan will help to continue guiding the city's water utility growth and provide the necessary tools to analyze any proposed changes or additions to the water system. As part of the master plan process, the City will also create a buried asset management program that will assist the City in managing maintenance of the water distribution system in the future. Additionally, the master plan addresses a goal established in the Aspire Plan to undergo updates more frequently than the standard 5 year cycle due to shifting development patterns and pressures. This project supports the Safety, Infrastructure and Services pillars of the Strategic Plan and Comprehensive Plan by providing a safe, resilient infrastructure for our citizens.

Additional Information

Justification

The project will improve system reliability and insufficient firm pumping capacity to meet existing peak flows and was recommended in the 2020 Master Plan. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing resilient infrastructure for our citizens.

Type of Project

Other

Rehabilitation of Wastewater Lines

Project Number: WW2306
Total Capital Cost: \$14,000,000.00

Department: Utility
Type: Capital Improvement

Request description:

This work to rehabilitate existing 30+ year old gravity wastewater lines within various neighborhoods in older sections of the City through the use of Cure-in-Place Pipe (CIPP) and pipe bursting where required. These neighborhoods would include Saxony, Bohls Place and Gatlinburg.

Additional Information

Justification

As these assets are well over 30 years old, we have seen significant issues with both I&I and with deflection in the gravity lines in these areas which cause higher than normal calls for wastewater related issues in the area and with higher levels of I&I being conveyed and treated at the wastewater treatment plant. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing resilient infrastructure for our citizens.

Type of Project

Other

15-inch Gilleland Creek Wastewater Interceptor

Project Number: WW2401
Total Capital Cost: \$3,675,400.00

Department: Utility

Additional Information

Justification

Project addresses insufficient interceptor capacity to meet projected peak flows and recommended to prevent SSOs in an impaired watershed. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing resilient infrastructure for our citizens.

Type of Project

Other

15-inch Northwest (NW) Wilbarger Wastewater Line Extension

Project Number: WW2402
Total Capital Cost: \$1,259,000.00

Department: Utility
Type: Capital Improvement

Request description:

This 15-inch wastewater line would extend from the western terminus of the 15-inch Wilbarger Interceptor crossing SH 130 to the western edge of Pflugerville Acres Subdivision, following along Panther Loop and Panther Drive. The wastewater extension is approximately 1,900 feet in length along the proposed route, however, a potential alignment of Rowe Lane is near this location.

Additional Information

Justification

This is a critical gravity wastewater line segment for development within the SH 45 area inside the city limits, which is within the TIRZ. The construction of this line, by the City or developers seeking cost-participation, would eliminate the need for a temporary lift station. At minimum, we may need to acquire a wastewater easement through one lot. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing resilient infrastructure for our citizens.

Additional Information

Justification Insufficient firm pumping capacity to meet existing peak flows and observed rehabilitation needs. The capacity expansion is a recommendation from the 2020 Master Plan. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing resilient infrastructure for our citizens.

Type of Project Other

Upper New Sweden Interceptor

Project Number: WW2501
Total Capital Cost: \$2,495,000.00

Department: Utility
Type: Capital Improvement

Request description:

This interceptor includes 18-inch, 21-inch, 27-inch, 33-inch, and 36-inch gravity mains in the Cottonwood West basin.

Additional Information

Justification This project will support growth in the Wilbarger Basin and divert flows as necessary to the Central Pump Station and was recommended in the 2020 Master Plan Update. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing safe, resilient infrastructure for our citizens.

Type of Project Other

24-inch Central Interceptor

Project Number: WW2702
Total Capital Cost: \$24,113,000.00

Department: Utility
Type: Capital Improvement

Request description:

30/24-inch interceptors replacing an existing 24/18-inch wastewater line along Dessau Road and Wells Branch Parkway.

Additional Information

Justification

This project was recommended in the 2020 Master Plan provides growth in the Central Basin that may cause increased flow. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing safe, resilient infrastructure for our citizens.

Type of Project

Other

15-inch SH 45 Interceptor

Project Number: WW2703
Total Capital Cost: \$4,886,000.00

Department: Utility
Type: Capital Improvement

Request description:

15-inch wastewater main north of State Highway 45 between Heatherwilde Boulevard and State Highway 130. This project will serve development northwest of the intersection of State Highway 45 and State Highway 130.

Capital Costs	To Date	FY2025	FY2026	FY2027	FY2028	FY2029	Total

Additional Information

Justification Increased flows due to growth along the State Highway 45 corridor. This project aligns with the Safety, Infrastructure and Services pillars of the Strategic Plan and supports the Comprehensive Plan by providing safe, resilient infrastructure for our citizens.

Type of Project Other

18-inch Colorado Sands Interceptor

Project Number: WW2704
Total Capital Cost: \$8,346,000.00

Department: Utility
Type: Capital Improvement

Request description:

18-inch interceptor in the western portion of the Wilbarger Basin that will serve the Colorado Sands development. The 24-inch interceptor downstream of this project will be financed by the developer.
