

City Council Meeting
May 11, 2021

2021-0468

Discuss and consider action to authorize the City Manager to execute a change order for the Central Wastewater Treatment Plant Expansion Phase I Improvements to Bar Constructors in the amount of \$130,813.37.

Building History

- Building was constructed without being hooked up to the emergency power generators and did not have a backup power source to run the centrifuges.
- During Winter Storm Uri, we were unable to waste solids out properly until full power was restored to the site which caused solids to back up in our clarifiers.
- This buildup of solids eventually causes downstream processes to both work harder and creates a better environment for tertiary treatment processes to fail.

Benefits

Electrical improvements to the Bio-solids building were scheduled to be constructed as with the Central Wastewater Treatment Plant Expansion Phase II Improvements.

Bio-solids building will have the capability to operate if the main electrical power supply is interrupted.

Contractors are onsite and have the ability to preform the work now.

Bio-Solids Building

Staff Recommendation

Approve action to authorize the City Manager to execute a change order for the Central Wastewater Treatment Plant Expansion Phase I Improvements to Bar Constructors in the amount of \$130,813.37.
