REXA Actuators
Proprietary Product

REXA Actuators, manufactured solely by REXA, Inc. outside of Boston, MA, are the industry standard for providing reliable & accurate process control. These benefits are achieved through a patented technology that only REXA Actuators employ. All REXA Actuators are custom engineered and made to order. As such, REXA Actuators are only supported directly by REXA, Inc. or via authorized sales representatives. No other manufacturer of this type of actuator exists.

The authorized sales representative for municipal water & wastewater accounts within the state of Washington is Treatment Equipment Company, located out of Bellevue, WA.

Orders from King County can be placed factory direct to REXA, Inc.

Should you have any questions regarding the support and distribution of REXA products, please feel free to contact us directly.

Erik Saitta
