RE: Additional Services - Surveying
Project: Pflugerville WWTP Improvement Project

Mr. Gee:

Inland Geodetics, LLC (Inland) is pleased to submit our proposal for professional land surveying services related to the above referenced project. Our proposal is to obtain additional design topographic data at the Pflugerville WWTP. This proposal was prepared from an email exhibits received in 27 June 2019. Below is a specific list of our proposed Scope of Services and estimated costs.

Right of Entry – it is assumed that the City of Pflugerville will grant rights of entry for the area of this project that will be affected. Inland Geodetics will require copies of returned ROE forms (if any) granting such access and any special instructions to that access before starting any work on private properties.

SCOPE OF SERVICES

A. Boundary Survey

1. Inland will utilize control monuments from the work performed for work performed at the WWTP previously.
2. Inland will perform sufficient research of deed records to update and verify current boundary line conditions at the project site and adjoining property to the north thereof. Inland will prepare two easement parcel plats with accompanying metes and bounds descriptions from CAD drawings provided by the client.

COMPENSATION

The ESTIMATED TOTAL LUMP SUM fee for the above services: **\$ 3,870.00**

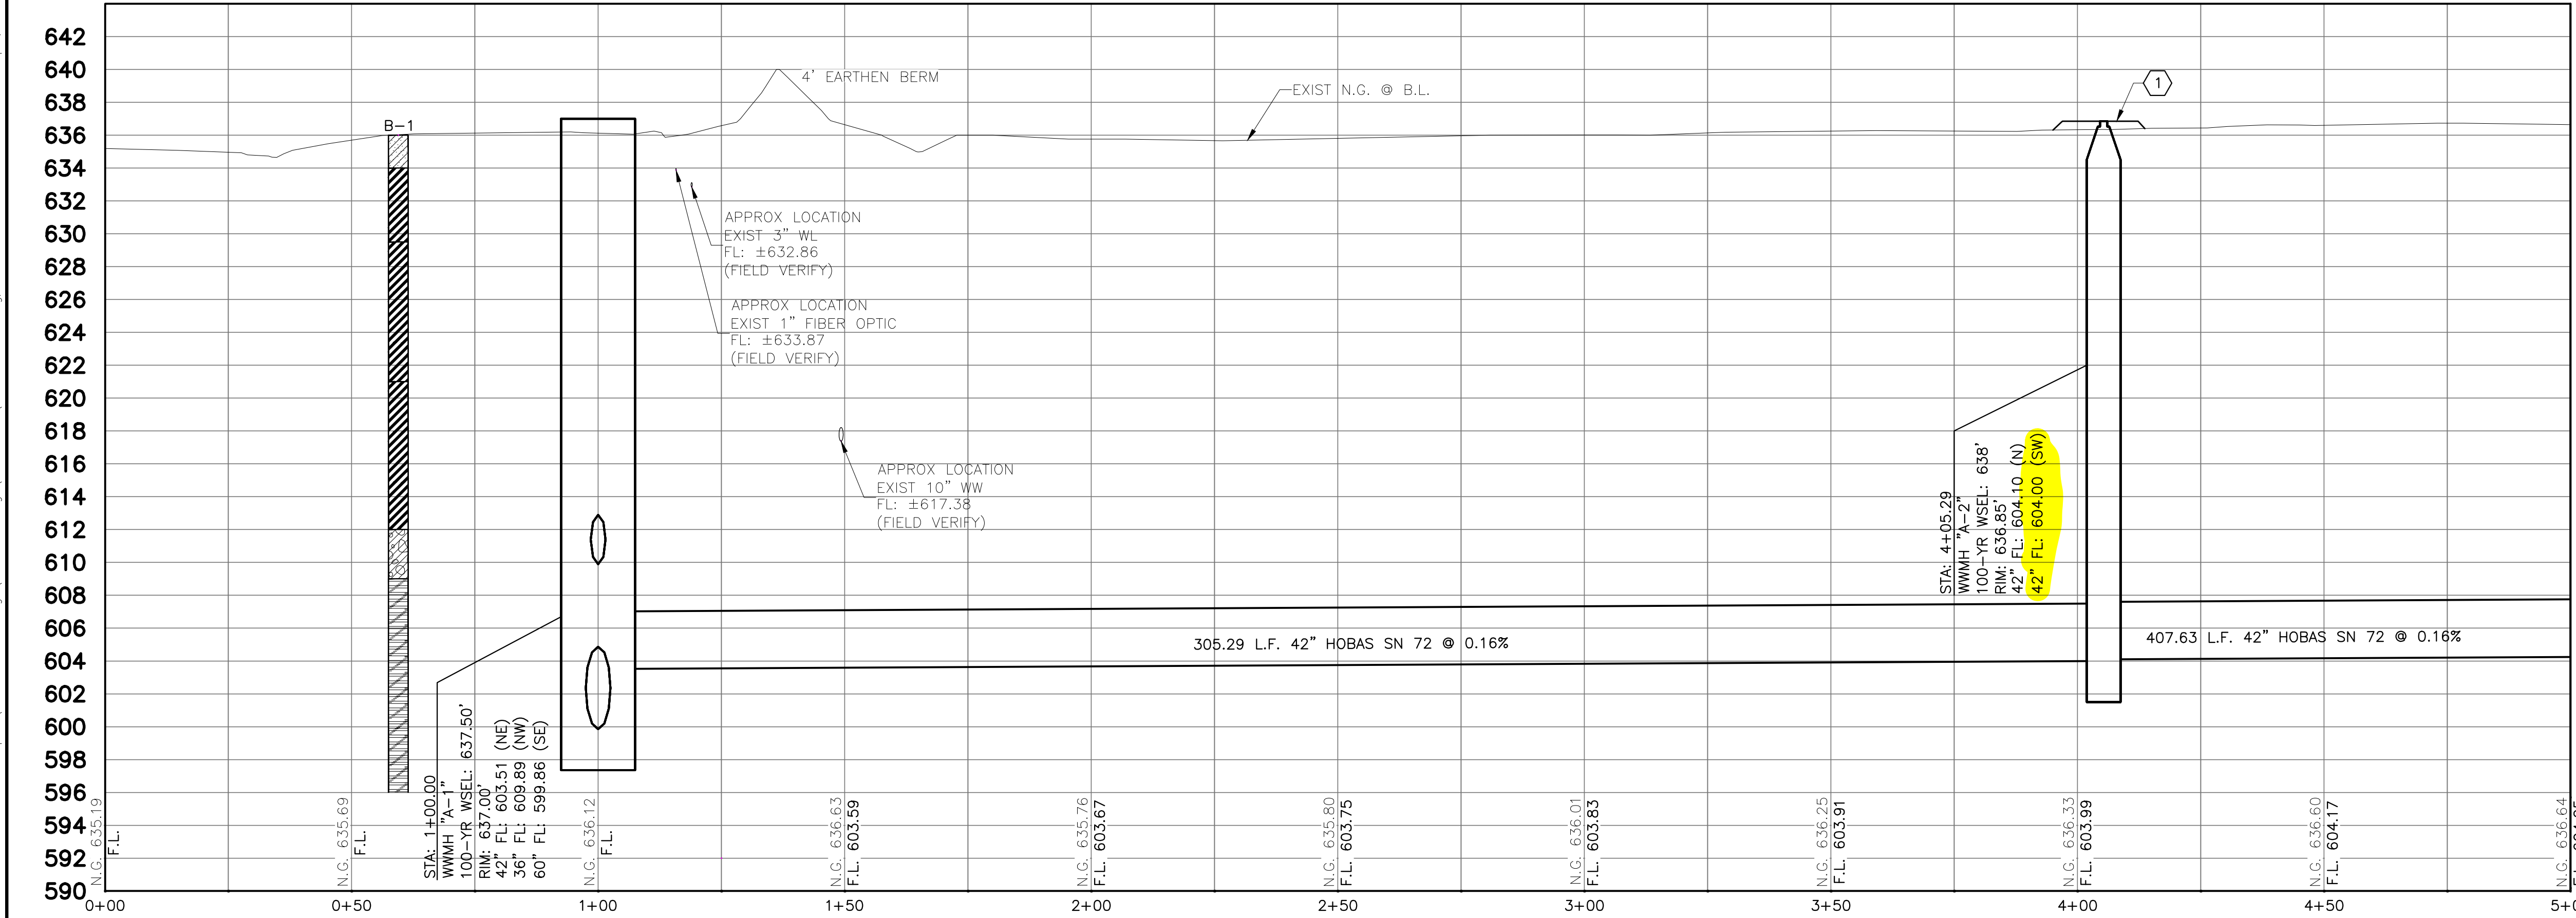

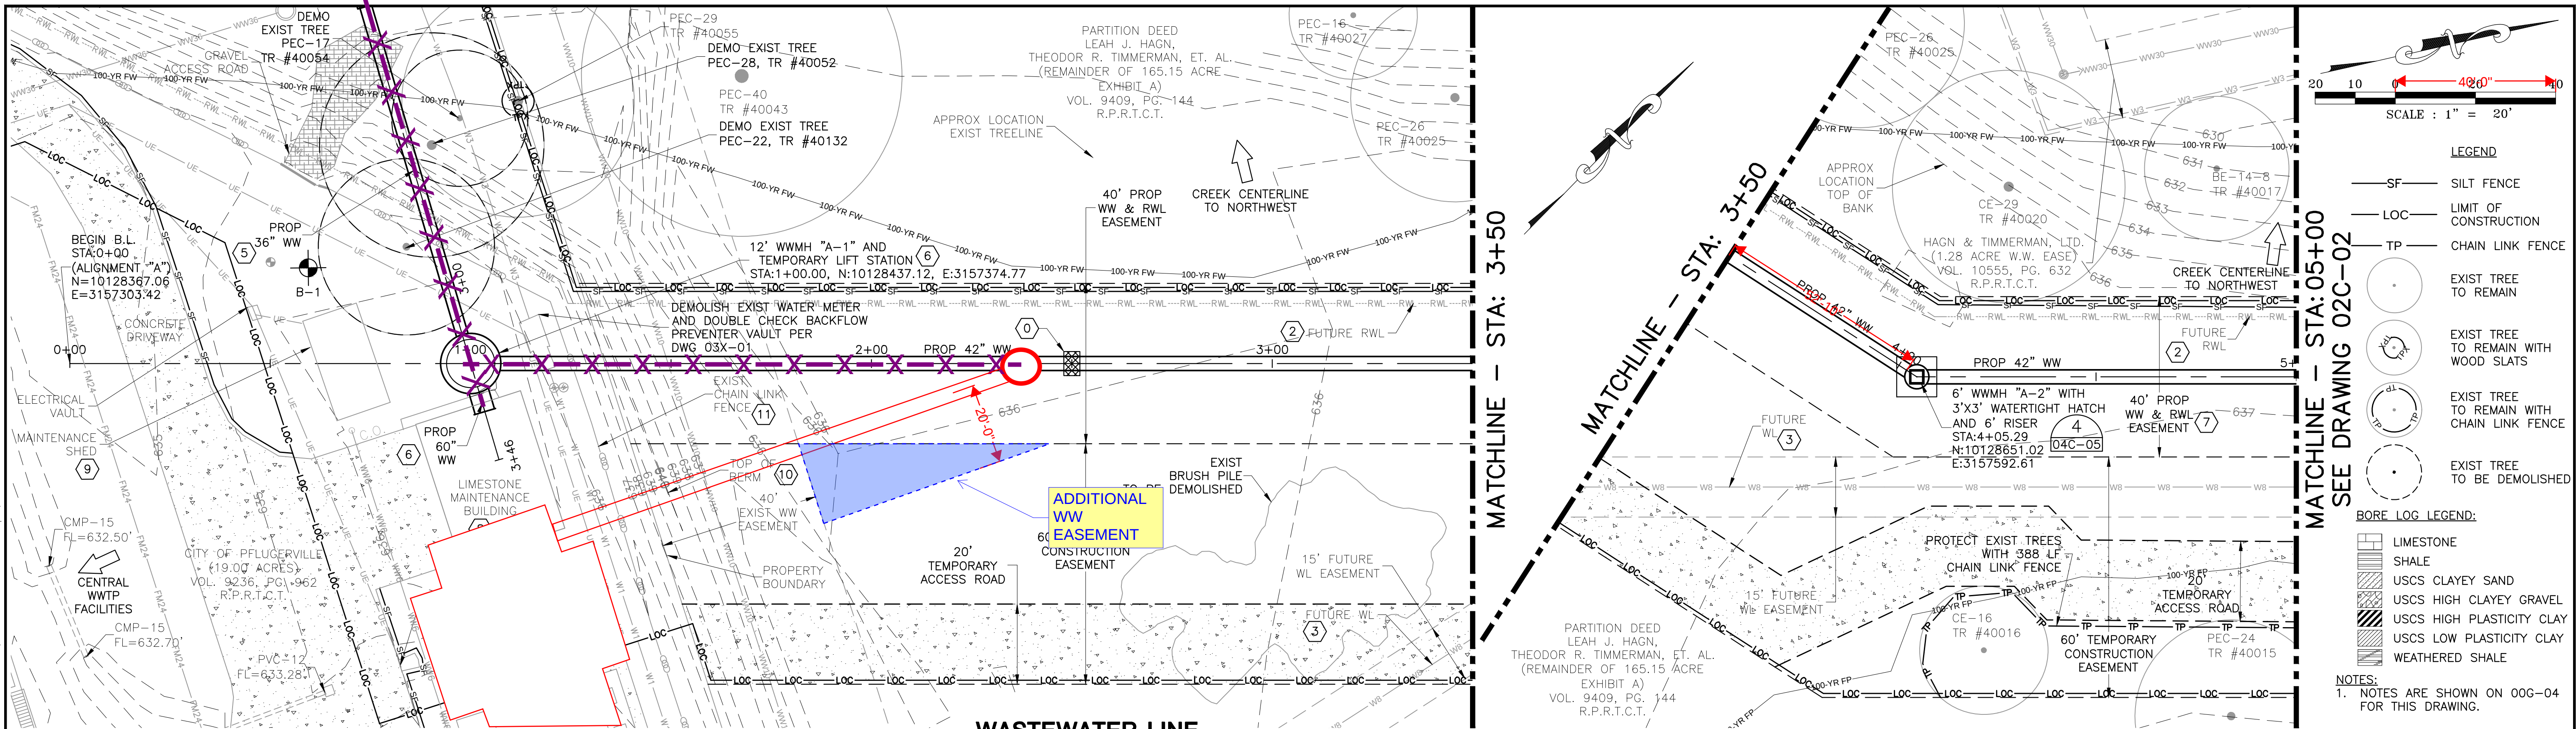

Inland will deliver on or before 2 weeks from NTP.

The estimated fee proposed above are based on personnel time required to perform the described Scope of Services. Additional time requirements resulting from project scope changes, weather delays, access issues, plan revisions, field recovery of or discrepancies of control provided will be considered 'reasonable cause' for us to seek additional compensation for services not included in these amounts. This proposal is good for 90 days from submittal.

Sincerely,

M. Stephen Truesdale
Principal
Registered Professional Land Surveyor
Licensed State Land Surveyor
